

## Program Component

### Purpose

The purpose of this document is to communicate the rules and to provide insight into how the new values for this COA field were arrived at.

### Program Component

<b>Field Definition</b>	The Program Component is used in Aspire as in FLAIR, to identify an entity for purposes of organization, management, accounting, reporting and budgeting. This chartfield will be maintained by the enterprise under the SHARE Set Id and is required on all expenditure and revenue transactions.
<b>Field Length</b>	10 digits
<b>Data Type</b>	Numeric
<b>Format</b>	All 10 positions must be filled. The State will continue to use the 10 digit state standard value as assigned by EOG. This value is made up of 5 component levels of two digits each.
<b>Uniqueness</b>	Program Component values are unique within the enterprise.
<b>Creation Process</b>	The Values will be converted to Aspire as they exist in FLAIR.
<b>Numbering Convention</b>	N/A
<b>Other Information</b>	<ul style="list-style-type: none"><li>• The long Description field will contain the abbreviated Program Component title as currently recorded in LAS/PBS. The long description will be a 30 character field and the short description a 10 character field.</li><li>• The current structure of the State Program field in FLAIR is 16 total characters broken out as 10 state standard and 6 agency assigned.</li></ul>
<b>Combination Edits</b>	Program Components to Budget Entity.
<b>Assumptions</b>	Further sub-classification of this value will no longer be allowed at the Agency level, hence the shortening of the field from 16 to 10.
<b>Mapping</b>	First 10 positions of FLAIR Program Component to Aspire Program Component.
<b>Data Mapping Tool Requirements</b>	An Excel worksheet will be created detailing the required mapping.
