

State of Florida Special Disability Trust Fund

Actuarial Study as of June 30, 2023

September 13, 2023

September 13, 2023

State of Florida Division of Workers' Compensation Special Disability Trust Fund 200 E. Gaines Street Tallahassee, FL 32399-0336

Mr. Thomas Krick Attn:

Special Disability Trust Fund Manager

Actuarial Study as of June 30, 2023

This study has been completed for the State of Florida Special Disability Trust Fund for the specific objectives listed in the study. It contains the analysis and conclusions of our work.

Each section and appendix of the study is an integral part of the whole. We recommend a review of the entire study prior to reliance upon this study.

No key personnel have a relationship with the State of Florida Special Disability Trust Fund that may impair our objectivity.

Please call if you have any questions. Thank you for the opportunity to be of service.

Respectfully submitted,

Aon Risk Consultants, Inc.

Martha E. Bronson, ASA, MAAA

Associate Director and Actuary

I. Background

The State of Florida Division of Workers' Compensation is responsible for administering the Special Disability Trust Fund (SDTF), which was established to encourage the employment of workers with a pre-existing permanent physical impairment. SDTF reimburses eligible employers or their carriers for the excess in workers' compensation benefits they have provided to an employee, where the employee's pre-existing permanent physical impairment has merged with a subsequent work-related accident to cause a greater impairment or loss.

SDTF determines the eligibility of claims, as well as audits and processes reimbursement requests. After a claim has been accepted, a request for reimbursement may be submitted annually. SDTF is responsible for the liabilities associated with both reported and unreported eligible claims with an accident date prior to January 1, 1998.

SDTF generates revenues to pay claims through an assessment applied to the net written premium of Florida workers' compensation insurance carriers. The basis for determining the assessment rate is established by Florida statute. In the past, there was an additional potential source of revenue from flat fees for new notices and proof of claim submissions. However, effective October 1, 2016, flat fees for new notices and proof of claim submissions are no longer required.

The claim period and fiscal year run from July 1 to June 30.

Our prior actuarial study was based on claim data valued as of June 30, 2022 (the "Prior Study", report dated September 13, 2022).

Data

The loss data provided for this study by SDTF consisted of claim, request, and proof detail valued as of June 30, 2023.

- Claim detail. This data included: accident and notice dates; claimant birth date and gender; and claim status. Claims with status "open::normal" were assumed to be open. The notice date was used to determine the number of newly filed notices of claims.
- Request detail. This data included: claim number; request, approval, and warrant (i.e., paid) dates; request status; request and approved (i.e., paid) amounts; and first and final indicators. We included payments only on requests with status "paid". Requested amounts on requests with status "payment refused" and non-blank approval date were used in calculating the costs avoided by the audit process, as directed by SDTF. The request and approval dates were used to determine the average time required to reimburse accepted claims.
- **Proof detail.** This data included: claim number and proof filed date. This date was used to determine the number of new proofs of claims processed.

SDTF also provided the 2022/23 administrative expenses and the cash balance as of June 30, 2023. In addition, we received information regarding several large requests that were unpaid as of June 30, 2023, including SDTF's estimated timing of payments related to these requests.

We relied on the paid loss triangles and cumulative paid losses as of June 30, 2019 shown in the actuarial study based on losses as of that date conducted by AMI Risk Consultants (the "AMI Report"). We assumed the total payments as of June 30, 2023 to be the June 30, 2019 amount plus the fiscal year 2019/20 through 2022/23 payments provided in the request detail. We understand that payment information in the request detail is incomplete for fiscal years 1994/95 and prior, and that the cumulative payments shown in the AMI Report include the estimated missing paid losses. The paid losses as of June 30, 2023 used in this study, the payments provided in the request detail, and the difference are shown in Exhibits OTFF-1 and FF-1.

In conducting this analysis, we relied upon the provided data without audit or independent verification; however, we reviewed it for reasonableness and consistency. Any inaccuracies in quantitative data or qualitative representations could have a significant effect on the results of our review and analysis. Any material discrepancies discovered in the loss or exposure data by SDTF or any other parties should be reported to us immediately, and if warranted, we will make appropriate amendments to the report.

Analysis

The projected ultimate losses for each claim period were estimated separately for first and final (F&F) claims and other than first and final (OTFF) claims. The estimated outstanding losses were calculated as the difference between the projected ultimate losses and the amount paid as of June 30, 2023. The projected amount to be paid in 2023/24 and subsequent fiscal years was based on the estimated outstanding losses and the selected payment pattern.

As of June 30, 2023, there were no open F&F claims, and only one payment has been made since fiscal year 2014/15. Thus, we assumed no outstanding liabilities as of June 30, 2023 for F&F claims. The claim data summary and historical paid loss development are provided in the FF exhibit series for information.

For other than first and final (OTFF) claims, we estimated the ultimate losses based on two actuarial methods: (1) paid loss development and (2) life annuity on open claims. An average of the two methods was selected based on actuarial judgment. The claim data summary and analysis are provided in the OTFF exhibit series.

In the life annuity method (shown in Exhibits OTFF-4 and OTFF-5), the estimated outstanding losses were projected for each open claim based on the claimant's birth date and gender, accident date, and the historical annual payments, separately for permanent disability and medical benefits. The estimated outstanding losses were then summarized by claim period, and the estimated ultimate losses were calculated by adding the amount approved and unpaid on closed claims and the total payments as of June 30, 2023. Key assumptions used in this method are noted below:

- Claims were divided into four categories:
 - Active at least one payment in the past five fiscal years;
 - o Recently dormant -most recent payment between 6 and 10 years ago;
 - o Long dormant most recent payment more than 10 years ago; and
 - No payments
- COLA adjustments were assumed to apply to permanent disability payments as follows:

Table I-1 COLA Adjustment Permanent Disability

Accident Date (1)	Prior to Age 62 (2)	Age 62+ (3)
Prior to 7/1/1984	0%	0%
7/1/1984 to 6/30/1990	5%	5%
After 6/30/1990	5%	0%

Note: Provided by SDTF.

- Medical payments were assumed to increase 4% per year.
- We also relied on the life tables in the report Social Security Disability Insurance Program Worker Experience, Actuarial Study No. 123.

II. Objectives

The specific objectives of this study are:

1. **Estimated Outstanding Losses and Unfunded Liability.** Estimated outstanding losses and the unfunded liability as of June 30, 2023, on both an undiscounted and discounted basis.

The estimated outstanding losses are the cost of unpaid claims. The unfunded liability is the difference between this estimate and the cash balance.

2. **Projected Losses Paid.** Projected losses paid during each fiscal year 2023/24 through 2027/28.

The projected losses paid are the claim disbursements during the indicated year, regardless of accident or report date.

- 3. **Summary of SDTF Claim Activity.** Summary of the number of open claims, newly filed notices of claims, proofs of claim processed, fee revenues refunded and applied to pay down SDTF's liability, the average time required to reimburse accepted claims, and the average administrative cost per claim. Comparison of these statistics for fiscal years 2021/22 and 2022/23.
- 4. **Costs Avoided through the Audit Process.** Summary of the costs avoided through the audit process during fiscal years 2006/07 through 2022/23.
- 5. **Comparison to the Previous Actuarial Study.** Comparison to the previous actuarial study, which was based on losses valued as of June 30, 2022.

III. Conclusions

We have reached the following conclusions:

1. Estimated Outstanding Losses and Unfunded Liability

The estimated outstanding losses and unfunded liability as of June 30, 2023 are shown in Table III-1A.

Table III-1A
Estimated Outstanding Losses and Unfunded Liability
June 30, 2023

Item (1)	Full Value (2)	Present Value (4%) (3)
(A) Estimated Outstanding Losses	\$251,217,633	\$184,662,108
(B) Fund Cash Balance	60,355,699	60,355,699
(C) Unfunded Liability	190,861,934	124,306,409

Note: (A) is from Exhibit SMRY-1.

(B) was provided by SDTF.

(C) = (A) - (B)

The present value of the estimated outstanding losses is the amount of money, discounted for anticipated investment income, required to meet unpaid claims. It is calculated based on a 4% yield on investments, as provided by SDTF.

The estimated unfunded liability decreased by \$19.5 million compared to the estimate as of June 30, 2022 of \$210.4 million shown in the Prior Study. The reconciliation of this change is provided in Table III-1B.

Table III-1B Reconciliation of Change in Unfunded Liability from June 30, 2022 to June 30, 2023

ltem (1)	Amount (2)
(A) Unfunded liability as of 06/30/22	\$210,408,952
(B) Claim payments made in 2022/23	(20,466,246)
(C) Change in projected ultimate losses	(3,146,000)
(D) Change in cash balance from 06/30/22 to 06/30/23	(4,065,229)
(E) Unfunded liability as of 06/30/23	190,861,934
(F) Change in unfunded liability	(19,547,018)

Note: (A) is fro

(A) is from the Prior Study.

(B) is based on the request detail provided by SDTF.

(C) is based on the projected ultimate losses shown in Exhibit SMRY-1 and the corresponding amounts in the Prior Study.

(D) is based on Table III-1A (row B) and the corresponding amount in the Prior Study.

(E) = (A) + (B) + (C) - (D)

(F) = (E) - (A)

A comparison of the projected ultimate losses from the Prior Study and current study, as well as the difference between the actual and expected fiscal year 2022/23 payments is provided in section 5.

2. Projected Losses Paid

The projected losses to be paid during fiscal years 2023/24 through 2027/28 are shown in Table III-2.

Table III-2
Projected Losses Paid
Fiscal Years 2023/24 to 2027/28

Fis	scal Year	Projected Paid Losses
	(1)	(2)
(A)	2023/24	\$26,998,456
(B)	2024/25	19,335,825
(C)	2025/26	17,238,426
(D)	2026/27	16,213,807
(E)	2027/28	15,239,607

Note: Amounts are from Exhibits OTFF-8 to OTFF-12

The total estimated outstanding losses as of June 30,

2023 are \$251.2 million (from Table III-IA).

The relatively high payments projected for 2022/23 reflect SDTF's anticipated payout of several large requests, including one request for \$5.9 million. For comparison, the actual paid losses during fiscal year 2022/23 were \$20.5 million.

3. Summary of SDTF Claim Activity

A summary of the SDTF's claim activity during 2022/23 is provided in Table III-3A. The corresponding 2021/22 activity is provided for comparison.

Table III-3A Summary of SDTF Claim Activity Fiscal Years 2021/22 and 2022/23

	Fiscal Year	
Item	2022/23	2021/22
(1)	(2)	(3)
(A) Number of open claims	650	729
(B) Number of notices filed	1	0
(C) Number of newly received proofs of claim	1	0
(D) Fee revenues received from 7/1 to 6/30	*	*
(E) Fee revenues refunded from 7/1 to 6/30	*	*
(F) Fee revenues applied to pay down liability in year	*	*
(G) Average months to reimburse accepted claims	2.7	4.1
(H) Average administrative cost per open claim	\$1,807	\$1,544

Note: (A.2) is from Exhibit OTFF-1.

(B.2) is based on the claim detail provided by SDTF.

(C.2) is based on the proof detail provided by SDTF. (D.2) to (F.2) Fees have not been required since October 1, 2016.

(G.2) is based on the request detail provided by SDTF.

(H.2) = \$1,174,447 / (A.2)

(3) is from the Prior Study.

The number of open claims decreased significantly over the past five fiscal years. As of June 30, 2018, there were 2,673 open claims compared to 650 as of June 30, 2023. This decrease reflects SDTF's efforts to close out inactive claims and to proactively identify deceased claimants, as well as the absence of new claims being filed. The open claimants as of June 30, 2023 ranged in age from 46 to 100, with an average of 75 years. A summary of the open claims by claimant age as of June 30, 2023 is provided in Table III-3B below.

The average time required to reimburse accepted claims decreased, from 4.1 months in 2021/22 to 2.7 months in 2022/23. This is a decrease of about 44 days in the approval to payment period.

The average administrative cost per open claim increased 17%, from \$1,544 in 2021/22 to \$1,807 in 2022/23. This change reflects a 4% increase in administrative expenses and an 11% decrease in open claims.

Table III-3B Summary of Open Claims By Claimant Age June 30, 2023

Age Range (1)	Average Claimant Age (2)	Average Life Expectancy (3)	Open Count (4)	Average Annual Payment (5)	Estimated Outstanding Losses (6)
(A) < 50	47	25	2	\$9,718	\$1,550,389
(B) 51 - 60	58	17	26	23,533	21,291,643
(C) 61 - 70	66	12	184	26,518	104,647,712
(D) 71 - 80	76	8	260	25,657	90,450,608
(E) 81+	86	4	179	26,058	33,277,281
(F) Total	75	8	651	\$25,877	\$251,217,633

Note:

(2) to (5) are based on Exhibit OTFF-4(6) was estimated based on Exhibits OTFF-4 and OTFF-7

About 67% of the open claimants are age 71 and above, with an average life expectancy of 6.7 years.

4. Costs Avoided through the Audit Process

The costs avoided through the audit process during fiscal years 2006/07 through 2022/23 are shown in Table III-4.

Table III-4
Costs Avoided through the Audit Process
2006/07 to 2022/23

Fiscal Year		Amount Requested	Amount Disallowed	% Disallowed
(1)		(2)	(3)	(4)
(A)	2006/07	\$321,671,468	\$26,916,321	8.4%
(B)	2007/08	144,439,649	15,278,320	10.6%
(C)	2008/09	75,657,898	5,104,561	6.7%
(D)	2009/10	39,023,028	3,294,101	8.4%
(E)	2010/11	79,826,067	7,427,534	9.3%
(F)	2011/12	64,106,512	5,273,905	8.2%
(G)	2012/13	63,705,889	5,803,297	9.1%
(H)	2013/14	60,330,846	4,320,796	7.2%
(I)	2014/15	67,107,485	4,391,439	6.5%
(J)	2015/16	48,958,288	3,721,124	7.6%
(K)	2016/17	39,804,367	2,305,781	5.8%
(L)	2017/18	36,390,401	2,422,081	6.7%
(M)	2018/19	34,564,450	1,952,851	5.6%
(N)	2019/20	25,852,381	1,303,297	5.0%
(O)	2020/21	31,426,939	1,381,567	4.4%
(P)	2021/22	26,876,070	2,276,961	8.5%
(Q)	2022/23	22,096,361	2,320,426	10.5%
(R)	Total	\$1,181,838,099	\$95,494,363	8.1%

Note: Amounts are from Exhibit SMRY-2.

During 2022/23, \$2.3 million (or 10.5%) of the requested amounts were disallowed through the audit process. For all years 2006/07 through 2022/23, the disallowed amount totals \$95.5 million.

5. Comparison to Previous Actuarial Study

The projected ultimate losses by claim period shown in the Prior Study are compared to those in the current study in Table III-5A.

Table III-5A Change in Projected Ultimate Losses from June 30, 2022 to June 30, 2023

Claim Period (1)	Projected Ultimate Losses as of 6/30/22 (2)	Projected Ultimate Losses as of 6/30/23 (3)	Change (3) - (2) (4)	Percentage Change (4) / (2) (5)
1978/79 & Prior	\$154,377,000	\$154,049,000	(\$328,000)	-0.2%
1979/80	58,002,000	57,856,000	(146,000)	-0.3%
1980/81	85,782,000	85,595,000	(187,000)	-0.2%
1981/82	107,267,000	107,018,000	(249,000)	-0.2%
1982/83	113,410,000	112,851,000	(559,000)	-0.5%
1983/84	128,517,000	127,810,000	(707,000)	-0.6%
1984/85	227,280,000	227,868,000	588,000	0.3%
1985/86	297,281,000	297,181,000	(100,000)	0.0%
1986/87	305,313,000	307,057,000	1,744,000	0.6%
1987/88	342,611,000	341,485,000	(1,126,000)	-0.3%
1988/89	442,122,000	441,710,000	(412,000)	-0.1%
1989/90	463,658,000	462,678,000	(980,000)	-0.2%
1990/91	361,028,000	361,226,000	198,000	0.1%
1991/92	307,772,000	306,596,000	(1,176,000)	-0.4%
1992/93	289,233,000	289,719,000	486,000	0.2%
1993/94	205,667,000	205,060,000	(607,000)	-0.3%
1994/95	123,990,000	124,237,000	247,000	0.2%
1995/96	123,632,000	123,440,000	(192,000)	-0.2%
1996/97	113,873,928	114,179,928	306,000	0.3%
1997/98	53,188,000	53,242,000	54,000	0.1%
Total	\$4,304,003,928	\$4,300,857,928	(\$3,146,000)	-0.07%

Note: Amounts as of June 30, 2022 are from the Prior Study. Amounts as of June 30, 2023 are from Exhibit SMRY-1.

For all claim periods, the change in the projected ultimate losses from June 30, 2022 to June 30, 2023 was -\$3.1 million (-0.07%).

The actual and expected paid losses, as well as the difference between these amounts are shown in Table III-5B.

Table III-5B
Difference Between Actual and Expected Payments
Fiscal Year 2022/23

	Losses Paid in Fiscal Year 2022/23			
	Paid		Difference	
Claim Period	Expected	Paid Actual	(3) - (2)	
(1)	(2)	(3)	(4)	
1978/79 & Prior	\$343,145	\$170,456	(\$172,689)	
1979/80	296,410	210,975	(85,435)

1986/87	2,494,837	2,359,812	(135,025)	
1987/88	1,533,153	802,529	(730,624)	
1988/89	2,342,511	2,001,076	(341,435)	
1989/90	3,197,460	3,105,867	(91,593)	
1990/91	1,940,888	2,022,491	81,603	
1991/92	1,565,020	630,932	(934,088)	
1992/93	1,547,656	1,527,905	(19,751)	
1993/94	6,933,760	1,500,179	(5,433,581)	
1994/95	694,656	648,211	(46,445)	
1995/96	868,444	587,007	(281,437)	
1996/97	741,786	826,684	84,898	
1997/98	371,906	449,310	77,404	
Total	\$29,682,694	\$20,466,246	(\$9,216,448)	

Note: (2) is from the Prior Study.

(3) is based on the request detail provided by SDTF.

The expected loss paid in 2022/23 from the Prior Study included an anticipated \$6.0 million payment related to one request, as previously directed by SDTF. SDTF has advised us that this payment is now scheduled for fiscal year 2023/24.

Conditions and Limitations

It is important to understand the conditions and limitations listed below. Each chapter and section is an integral part of the whole study. If there are questions, please contact Aon for clarification.

- Data Quality. In conducting this analysis, we relied upon the provided data
 without audit or independent verification; however, we reviewed it for
 reasonableness and consistency. Any inaccuracies in quantitative data or
 qualitative representations could have a significant effect on the results of
 our review and analysis. Any material discrepancies discovered in the loss
 data by the organization or any other parties should be reported to us
 immediately, and if warranted, we will make appropriate amendments to the
 report.
- **Economic Environment.** Unless otherwise stated, we assumed the current economic conditions will continue in the foreseeable future.
- **Insurance Coverage.** Unless otherwise stated, we assumed no insurance coverage changes (including coverage provided by the organization to others) subsequent to the date this study was prepared. This includes coverage language, self-insured retention, limitations and similar issues.
- **Insurance Solvency.** Unless otherwise stated, we assumed all insurance purchased by the organization is from solvent sources payable in accordance with terms of the coverage document.
- **Interest Rate.** The exhibits specify the annual interest rate used.
- **Methodology.** In this study, different actuarial methods were applied. In some instances, the methods yield significantly disparate results. The estimates, projections and recommendations in this study reflect our judgments as to the best method or combination of methods that are most reliable and reflective of the exposure to loss.
- **Risk and Variability.** Insurance is an inherently risky enterprise. Actual losses may vary significantly from our estimates, projections and recommendations. They may emerge higher or lower.
- Statutory and Judicial Changes. Legislatures and judiciaries may change statutes that govern indemnification. This includes benefit levels for workers compensation, immunities and limitations for liability, and other similar issues. Unless otherwise stated, we assumed no statutory changes subsequent to the date this study was prepared.
- **Supplemental Data.** In addition to the data provided by the organization, we supplemented our analysis with data from similar organizations and

insurance industry statistics, as we deemed appropriate.

• **Use and Distribution.** Use of this report is limited to the organization shown on the transmittal page for the specific purpose described in the Background section. Other uses are prohibited without an executed release with Aon.

Distribution by the organization is unrestricted. We recognize that this report may be distributed to its independent auditing firm. No further distribution of this report is permitted unless authorized by Aon. The report should only be distributed in its entirety including all supporting exhibits.

Glossary of Actuarial Terms

Actuarial Methods (Most Common)

A major objective of an actuarial study is to statistically project ultimate losses. The following actuarial methods are the most common:

- Developed Paid Losses
- Developed Reported Incurred Losses
- Developed Case Reserves
- Frequency Times Severity Analysis
- Loss Rate Analysis

The following describes each method:

 Developed Paid Losses. Paid losses represent the amounts actually paid to claimants (less excess insurance recoveries). As time goes on, loss payments continue until all claims are closed and there are no remaining payments expected. At this time, the ultimate losses for the claim period are known. This common process is called "paid loss development."

Paid loss development is an extrapolation of actual dollars paid. It does not depend on case reserve estimates. A potential shortcoming of utilizing this method is that only a small fraction of total payments have been made for the most recent claim periods. Extrapolating ultimate losses based on small amounts of actual payments may be speculative. A second potential shortcoming is that payment patterns can change over time.

2. Developed Reported Incurred Losses. Reported incurred losses are paid losses plus case reserves. In most programs, total reported incurred losses underestimate the ultimate losses. Over time, as more information about a body of claims becomes known, they are adjusted either up or down until they are closed. Though many individual claims settle for less than what was estimated, these decreases are generally more than offset by increases in the cost of other claims for which new information has emerged.

The net effect is that total estimated costs are often revised upward over time. This normal process is called "reported incurred loss development." Actuaries typically review the development patterns of the recent past to make projections of the expected future loss development and, therefore, estimations of ultimate losses.

3. **Developed Case Reserves.** A case reserve is an estimate of the unpaid amount established by claims adjusters for which a particular claim will ultimately be settled or adjudicated. The developed case reserves method is a hybrid of the paid loss development and reported incurred loss development methods. It relies on the historical adequacy of case reserves to predict ultimate losses.

- 4. **Frequency Times Severity Analysis.** The frequency times severity analysis is an actuarial method that uses a preliminary projection of ultimate losses to project claims severity. The claims severity times the number of claims is a predictor of ultimate losses. The focus of the frequency times severity analysis is that ultimate losses each period are dependent on the number of claims.
- 5. **Loss Rate Analysis.** The loss rate analysis is based on the historical loss rates per exposure unit (such as payroll, vehicles or property value). The loss rates (projected ultimate losses divided by exposure units) are trended to reflect the effect of claim cost inflation and retention changes. The trended loss rates represent the rates that one would see if all of the claims had been handled in the claim cost environment that will be present in the upcoming period. The trended loss rate times the projected exposure units is a predictor of losses.
- 6. **Bornhuetter-Ferguson Method (B-F).** The B-F method is an actuarial method that weights a preliminary projection of ultimate losses with projections of ultimate losses determined by other actuarial methods (usually the developed paid losses and developed reported incurred losses methods). For less mature claim periods, the B-F method leans more heavily to the preliminary projection. It gradually converges to the projections of ultimate losses determined by the other actuarial methods as the claim periods mature.

Actuary

A specialist trained in mathematics, statistics, and finance who is responsible for rate, reserve, and dividend calculations and other statistical studies.

Allocated Loss Adjustment Expenses

Allocated loss adjustment expenses (ALAE) are the direct expenses to settle specific claims. These expenses are primarily legal expenses.

Governmental Accounting Standards Board (GASB) Statement No. 10 requires that ALAE be included in financial statements and that they be calculated by actuarial methods.

American Academy of Actuaries

A society concerned with the development of education in the field of actuarial science and with the enhancement of standards in the actuarial field. Members may use the designation MAAA (Member, American Academy of Actuaries).

Benefits

The financial reimbursement and other services provided insureds by insurers under the terms of an insurance contract. An example would be the benefits listed under a life or health insurance policy or benefits as prescribed by a workers compensation law.

Casualty Actuarial Society

A professional society for actuaries in areas of property and casualty insurance work. This society grants the designation of Associate of the Casualty Actuarial Society (ACAS) and Fellow of the Casualty Actuarial Society (FCAS).

Claim

Demand by an individual or entity to recover for a loss.

Claims Made

A policy written on this basis covers only those claims that are made during the policy period. Coverage for prior acts is provided back to what is known as the retroactive date, which is the effective date of the original claims made policy with the same insurer.

Composite Rate

A single rate with a single basis of premium (e.g., payroll or sales). For this single rate the insured is covered for a variety of hazards, such as premises and operations, completed operations, products liability, and automobile. Its primary value is to compute premium simply.

Confidence Level

A confidence level is the statistical certainty that an actuary believes funding will be sufficient. For example, an 80% confidence level means that the actuary believes funding will be sufficient in eight years out of ten.

Confidence levels are determined based on mathematical models. Coverages that are low frequency and high severity (such as excess liability) are subject to greater risk than coverages that are high frequency and low severity (such as automobile physical damage). Therefore, they need a greater margin to attain a given confidence level.

Coverage

The scope of the protection provided under a contract of insurance.

Credibility

Credibility is the belief that the sample data is an accurate reflection of the larger population. Credibility is highest when the sample data is large and the standard deviation (discussed later) of the larger population is low.

Dates

There are at least three milestone dates in a claim. They are the date of injury or accident, the date of report and the date of closure. It is best if each of these dates is recorded. Some organizations may also keep the date a claim becomes a lawsuit, as opposed to a demand. Aon recommends this additional level of detail, especially if the data is to be used for litigation management.

Deductible

The portion of an insured loss to be borne by the insured before he is entitled to recovery from the insurer. Deductibles may be expressed as a dollar amount, percentage or waiting period.

Disability

A condition that curtails a person's ability to carry on his normal pursuits. A disability may be partial or total, and temporary or permanent.

Dividend (Policyholder)

The return of part of the premium paid for a policy issued on a participating basis by either a mutual or a stock insurer.

Estimated Outstanding Losses

Estimated outstanding losses are the cost of claims that have occurred but have not yet been paid. They typically include indemnification and allocated loss adjustment expenses (ALAE), but not unallocated loss adjustment expenses (ULAE).

Estimated outstanding losses are calculated as projected ultimate losses less paid losses. Alternatively, they are the sum of case reserves and incurred but not reported (IBNR) claims.

Estimated outstanding losses are usually the largest single item listed as a liability on the balance sheet of a public entity's financial statement. GASB Statement No. 10 requires they be calculated by actuarial methods. Other common names for estimated outstanding losses are outstanding claims liabilities and unpaid claims.

Experience Rating

A method of adjusting the premium for a risk based on past loss experience for that risk compared to loss experience for an average risk.

Exposure Data

Exposure data refers to the activities of the organization. For example, payroll is the most common exposure measure for workers compensation. Aon suggests collecting exposure data with the following characteristics:

- Readily Available. The exposure data should be easily obtained. It is best if it is a byproduct of other activities, although this is not always possible. If getting data is arduous, it may discourage collection.
- ➤ Vary With Losses. The exposure data should correlate directly with losses. The ideal situation is where exposure and expected losses move in tandem. The exposure base needs to be fitting to the coverage. For example, the number of employees may vary with property losses (more employees = more office space = more losses), but property value is a clearly superior exposure base for property losses.

Generally Accepted Accounting Principles (GAAP)

These principles are intended to produce financial results (in the insurance industry) consistent with those of other industries and to assure consistency in financial reporting.

Incurred But Not Reported

IBNR is really comprised of two distinct items. These are the development of known case reserves (incurred but not enough reported [IBNER] and incurred but not yet reported [IBNYR]).

IBNER are the actuary's estimate of the inadequacy of case reserves. Most claims settle at amounts close to what is set by the claims administrator. Some claims close favorably and some emerge as more expensive. On balance, case reserves tend to be too low (especially for recent years). IBNER is the actuary's estimate of the amount total case reserves will rise upon closure.

IBNYR refers to those claims that have occurred, but have not yet been reported. A classic example is medical malpractice claim reported several years after the medical procedure was performed.

Insurance Services Office (ISO)

An organization of the property and casualty insurance business designed to gather statistics, promulgate rates, and develop policy forms.

Investment Income

The return received by entities from their investment portfolios, including interest, dividends and realized capital gains on stocks. Realized capital gains means the profit realized on

assets that have actually been sold for more than their purchase price.

Limited

Most programs purchase excess insurance for catastrophic claims. For example, they may purchase coverage for claims above a \$500,000 per occurrence self-insured retention. "Limited" refers to an estimate or projection being limited to the self-insured retention. In contrast, "unlimited" means a loss projection not limited to the self-insured retention.

Other common names for limited are net of excess insurance or capped losses.

Loss Development

The difference between the amount of losses initially estimated by the insurer and the amount reported in an evaluation on a later date. Loss development is typically measured for paid losses, reported incurred losses and claim counts.

Manual Rates

Usually, the published rate for some unit of insurance. An example is in the workers compensation manual, where the rates shown apply to each \$100 of the payroll of the insured, \$100 being the "unit."

National Council on Compensation Insurance (NCCI)

An association of workers compensation insurance companies whose main functions are collecting statistics and calculating rates, establishing policy wording, developing experience and retrospective rating plans, and serving as the filing organization for member companies.

Net

Many pooling programs assign deductibles to members. For example, each member may have a \$5,000 per claim deductible. "Net" refers to a loss estimate or projection that excludes amounts below member deductibles.

Occurrence

An event that results in an insured loss. In some lines of insurance, such as general liability, it is distinguished from accident in that the loss does not have to be sudden and fortuitous and can result from continuous or repeated exposure that results in bodily injury or property damage neither expected nor intended by the insured.

Pool

An organization of entities through which particular types of risks are written with the premiums, losses, and expenses shared in agreed amounts among the members belonging to the organization.

Premium

The price of insurance protection for a specified risk for a specified period of time.

Present Value

The amount of money that future amounts receivable are currently worth. For example, a Life Insurance policy may provide for payments to be made monthly for ten years. The present value of that money would be less than the total amount of the regular periodic payments for 10 years because of the amount of interest that a present lump sum could earn during the term than the payments otherwise would have been made.

Probability

The probability is the likelihood of an event. It is a measure of how likely a value or event is to occur. It can be measured from data by calculating the number of occurrences of the value or event divided by the total number of occurrences. This calculation can be converted to a percentage. For example, tossing a coin has a 50% probability of heads or tails.

Projected Losses Paid

Projected losses paid are the projected claims disbursements in a period, regardless of when the claim occurred. They typically include indemnification and ALAE, but not unallocated loss adjustment expenses (ULAE).

"Projected losses paid" is a cash-flow analysis that can be used in making investment decisions.

Projected Ultimate Losses

Projected ultimate losses are the accrual value of claims. They are the total amount that is expected to be paid in a particular claim period after all claims are closed. Projected ultimate losses are the total loss costs for a particular period. They typically include indemnification and ALAE, but not ULAE.

Other common names for projected ultimate losses are expected losses, ultimate losses and total losses.

Rate

The cost of a given unit of insurance. For example, in life insurance, it is the price of \$1,000 of the face amount. In property insurance, it is the rate per \$100 of value to be insured. The premium is the rate multiplied by the number of units of insurance purchased.

Retrospective Rating

A method for which the final premium is not determined until the end of the coverage period, and is based on the insured's own loss experience for that same period. It is usually subject to a maximum and minimum premium. A plan of this type can be used in various types of insurance, especially workers compensation and liability, and is usually elected by only very large insureds.

Salvage

Property taken over by an entity to reduce its loss. Automobile physical damage losses can be reduced by the sale of recovered vehicles.

Schedule Rating

The application of debits or credits within established ranges for various characteristics of a risk according to an established schedule of items. Under liability and automobile insurance, the schedule rating plan allows credits and debits for various good or bad features of a particular commercial risk. An example in automobile schedule rating would be allowing credits for driver training classes or fleet maintenance programs.

Self-Insurance Retention (SIR)

That portion of a risk or potential loss assumed by an insured. It is often in the form of a per occurrence deductible.

Society of Actuaries (SOA)

A professional society for actuaries in areas of pensions, and life and health insurance work. The SOA grants the designation Associate of the Society of Actuaries (ASA) and Fellow of the Society of Actuaries (FSA).

Standard Premium

Most often used in connection with retrospective rating for Workers Compensation and General Liability Insurance. It is the premium of which the basic premium is a percentage and is developed by applying the regular rates to an insured's payroll.

State Fund

A fund set up by a state government to finance a mandatory insurance system, such as Workers Compensation or non-occupational disability benefits. Such a fund may be monopolistic, i.e., purchasers of the type of insurance required must place it in the state fund; or it may be competitive, i.e., an alternative to private insurance if the purchaser desires to use it.

Statutory Accounting Principles (SAP)

Those principles required by statute that must be followed by an insurance company or other similar entity when submitting its financial statement to the state insurance department. Such principles differ from (GAAP) in some important respects. For one thing SAP requires that expenses must be recorded immediately and cannot be deferred to track with premiums as they are earned and taken into revenue.

Unallocated Loss Adjustment Expenses

Unallocated loss adjustment expenses (ULAE) are the indirect expenses to settle claims. These expenses are primarily administration and claims handling expenses.

GASB Statement No. 10 requires that ULAE be included in financial statements and that they be calculated by actuarial methods.

Appendix C

Exhibits

The attached exhibits detail our analysis.

Data was provided by SDTF.

^{*} Claim period 1997/98 includes the 6 months from 7/1/97 to 12/31/1997. The age of this year has been adjusted to reflect the shortened period.

⁽⁵⁾ is the count of unique claim numbers with non-zero payments in the request detail provided by SDTF.

⁽⁶⁾ is the count of claims in the claim detail with status of "Open::Normal"

^{(7) =} cumulative paid as of 6/30/19 from the AMI Report + fiscal year 2019/20 and subsequent payments in the request detail provided by SDTF.

^{(8) =} total payments through 06/30/23 provided in the request detail by SDTF.

(1), (2), and (4) were provided by SDTF.

(3) is based on the claimant birthday provided by SDTF.

(5) and (8) are based on:

Active claims had at least one payment during 2018/19 thru 2022/23.

Recently dormant claims are those for which the most recent payment was during 2013/14 thru 2017/18.

Long dormant claims are those for which the most recent payment was prior to 2013/14.

Claims with no payments are those for which no payments have been made.

(6) and (9) are based on:

Active claims: average annual paid amount during 2018/19 thru 2022/23.

Recently dormant claims: most recent annual payment made during 2013/14 thru 2017/18.

Long dormant claims: assumed = \$0 Claims with no payments: assumed = \$0

(7) and (10) are based on (3), (4), and (6) or (9), as well as the life tables in the report Social Security Disability Insurance Program Worker Experience, Actuarial Study No. 123. The COLA adjustment for permanent disability benefits was assumed to be 0% for claims with accident dates prior to 7/1/84 and 5% for accidents occurring subsequently. For claims with accident date after 6/30/90, the 5% COLA adjustment was assumed to be 0% upon attaining age 62.

The medical cost trend was assumed to be 4% per year.

(11) = (7) + (10)

Data was provided by SDTF.

^{*} Claim period 1997/98 includes the 6 months from 7/1/97 to 12/31/1997. The age of this year has been adjusted to reflect the shortened period.

⁽⁵⁾ is the count of unique claim numbers with non-zero payments in the request detail provided by SDTF.

⁽⁶⁾ is the count of claims in the claim detail with status of "Open::Normal"

^{(7) =} cumulative paid as of 6/30/19 from the AMI Report + fiscal year 2019/20 and subsequent payments in the request detail provided by SDTF.

^{(8) =} total payments through 06/30/23 provided in the request detail by SDTF.
