

Division of Workers' Compensation

DIVISION DATABASES

Workers' Compensation Databases

Listed below are databases within the FLDFS.com/WC/ website:

- [DWC E-Alerts](#) Subscribe to free Division of Workers' Compensation email updates. Important announcements are sent out periodically.
- [Insurer/Claim Administrator Database](#)
This Database contains current address and contact information for those claims administrators, self-insurers, and third party administrators approved to handle workers' compensation claims of injured employees in the State of Florida. If you have any questions or problems with the information contained in this database, contact (850) 413-1786 or Linda.Yons@fldfs.com.
- [Insurers licensed to do business in the State of Florida](#)
- [PSR Report Viewer](#)
This program can be used to view and print .PSR Report Files that are sent to you. This is typically only needed if you are performing EDI Data Exchange with workers' compensation.
- [Proof of Coverage Database \(Compliance\)](#)
The Compliance Database provides information regarding workers' compensation coverage and exemptions from workers' compensation. Effective 05/03/2002, this information has been updated and is once again available to the public. Due to the formatting differences between EDI records and those formerly received on paper, you may experience two records for the same employer/FEIN with slightly different name variations. The Division is working to merge these records as quickly as possible. Exemption data will continue to be maintained and available as usual. The Bureau of Compliance continues to take referrals for investigation of civil non-compliance through the Internet, in person, by phone, or by e-mail. The Bureau of Compliance's toll-free referral hotline is 1-800-742-2214. Please direct all other questions with regard to proof of coverage to the Bureau of Compliance, Customer Service Unit, (850) 488-2333.
- [Construction Policy Tracking Database](#)
The Construction Policy Tracking Database provides information to contractors regarding the coverage status of the contractors they use. This easy-to-use system will send contractors automatic electronic notification of any changes to their contractor's coverage status. The only action required of the contractor is to register and list the contractors for whom they would like to receive coverage notification.
- [Non-Compliance Referral Form \(Whistle-Blower\)](#)
To report an employer you suspect has illegally failed to secure workers' compensation insurance coverage for all of the employer's employees, complete this form.
- [Provider Databases](#)
The Health Care Provider and Expert Medical Advisor databases are updated daily and offer the most current listing of physicians and practitioners approved by the Division as workers' compensation service providers. Please direct questions regarding these databases to the Office of Medical Services at (850) 413-1613 or workers.compmedservice@myfloridacfo.com.
The Qualified Rehabilitation Provider databases for Individuals, Companies and Facilities are maintained by the Department of Education's Division of Vocational Rehabilitation. Please direct questions to the Bureau of Reemployment Services regarding these databases at (850) 245-3470.
- [Claims Database](#)
The claims database contains Workers' Compensation accident data on an individual claim basis. As of November 2003, a PIN is no longer required to access this information. The information relating to personal financial or health information has been redacted from the database in compliance with 440.125 and 626.9651, F.S. and Rule 4-128, F.C.A. For questions regarding the inability to access the system, contact the Division's Helpdesk at (850) 413-1905.
- [Statistical Reports Based on Claims Data](#)
The user can generate statistical reports from the most recent end-of-month claims file. Records may be selected either by county, year of injury, nature of injury, or other claim characteristics. Output consists of aggregated data by year of injury for: the number of injuries, total benefits (including indemnity, medical, and settlement payments), and average benefits for each category.

- [Workers' Compensation Policy Search Page](#)
Expiring or Effective Policy Search - This Search will produce a downloadable list of Employers in the State of Florida whose workers' compensation Insurance policies are either due to expire within the month and year selected or become effective within the month and year selected. The search can be narrowed by also specifying a County and/or an Insurance Carrier. All Policies Search by County - This Search will produce a downloadable list of Employers in a specific Florida County who have CURRENT workers' compensation Insurance policies. The search can be narrowed by also specifying an Insurance Carrier.
- [Employer Loss Run Report](#)
This screen can be used to generate a list of lost-time injuries reported to the Division of workers' compensation for an employer since 1990. The user must provide the employer FEIN and may select a narrower range of accident dates if desired.
