Emergency Support Functions

The State of Florida must be prepared to respond quickly and effectively on a 24-hour basis to developing events. When an event or potential event is first detected, the State Emergency Operations Center is activated to a level appropriate to the magnitude of the threat. The State's response effort is then initiated through the State Emergency Response Team (SERT), which is comprised of Governor-appointed Emergency Coordination Officers (ECO) from State Agencies and volunteer organizations. These Emergency Coordination Officers are authorized to use the resources of their respective agency or organization to carry out response and recovery missions that are assigned by functions.

All State agencies and volunteer organizations, that comprise the State Emergency Response Team, are grouped into 17 Emergency Support Functions (ESF) to carry out coordination and completion of assigned missions. These functions represent specific response activities that are common to all disasters. Each Emergency Support Function is comprised of one or more Primary agency (ies) serving as the lead and several other agencies and organizations providing support.

The ESF is a mechanism that consolidates multiple agencies that perform similar or like functions into a single, cohesive unit to allow for the better management of emergency response functions (for example, many different state and local agencies have sworn law enforcement officers. Under the ESF concept, these law enforcement agencies all function as one under ESF 16). The ESF concept was developed by the Federal Emergency Management Agency (FEMA) in the late 1980s to address the potential management concerns that would be necessary to coordinate a federal response to a catastrophic earthquake in California. FEMA subsequently implemented the ESF concept in the development of its Federal Response Plan. In Florida, 15 of the 17 ESFs fall under one of four branches in the Operations Section: Emergency Services, Human Services, Infrastructure Support and Operations Support (You will find detailed information on ESF branch assignments in the individual ESF annexes).

Layout for the ESF 4 and 9 Operations Room

**STATE OF FLORIDA
DEPARTMENT OF FINANCIAL SERVICES
DIVISION OF STATE FIRE MARSHAL**

Policy No.: 1-31 **By Authority of the Division Director:**

Effective: _____

Revised: _____

(1) TITLE

Standard Administrative Procedures
Emergency Support Functions 4, Firefighting and 9, Search and Rescue
State Emergency Operations Center

(2) REFERENCES AND AUTHORITY

Chapter 252 and Chapter 943, Florida Statutes
State of Florida Comprehensive Emergency Management Plan (CEMP)
Department of Financial Services Coordinated Disaster Plan (DOFSCDP)
Division of State Fire Marshal Emergency Operations Plan (SFMOP)
Division of Forestry Fire Suppression Plan (DOFFSP)
The Florida Fire Chiefs' Association Fire/Rescue Emergency Response Plan

(3) PURPOSE AND STATEMENT OF POLICY

It is the responsibility of the Division of State Fire Marshal (SFM) to be prepared to coordinate a variety of disaster-related activities. These activities include Lead Agency for operations at the State Emergency Operations Center (SEOC) for Emergency Support Function (ESF) 4, Firefighting and ESF 9, Search and Rescue.

To facilitate the coordination within the SFM, and with those outside agencies with assigned support roles, the following procedures have been developed:

- **Standard Operations**
- **Administrative Procedures**
- **Wildfire Incidents**
- **Search and Rescue Incidents**
- **Terrorism Incidents**

(4) DEFINITIONS

ECO – Emergency Coordinating Officer

ESF - Emergency Support Function

SEOC – State Emergency Operations Center

STRATEGIC INFORMATION DISTRIBUTION: Strategic Information Distribution (SID) is e-mail prepared (1) by staff manning the State Emergency Operations Center (SEOC) during a limited activation (Level Two) or a full activation (Level One), or (2) by the Administrative Manager during a monitoring only activation (Level Three). The e-mail will be distributed at least once per day in a limited activation, or at least twice per day in a full activation. It will contain general information, such as current situation, plans, forecasts, missions assigned, and any information as determined by the Incident Manager. Distribution is to pre-determined groups, including Department of Financial Services management, with interest in the ESF 4 & 9 operations.

RFA – Request for Assistance

RTAR – Response to Assistance Request

CAP – Civil Air Patrol

WMD – Weapon of Mass Destruction

(5) STANDARD OPERATIONS

(a) Introduction

The SFM is designated as the lead state agency for ESF 4 and 9 at the SEOC. Additionally, the SFM has coordination responsibilities with outside agencies with assigned support functions.

(b) Purpose

This Standard Operating Procedure (SOP) outlines policies, procedures, and responsibilities for organizing and staffing the ESF 4 and 9 operations room at the SEOC.

1. Applicability

This SOP applies to all SFM personnel and support personnel within the:

a. Office of the Director

- b. Bureau of Fire Standards and Training
- c. Bureau of Fire Prevention
- d. Bureau of Fire and Arson Investigations
- e. Fire and Arson Laboratory
- f. Support agencies including the Division of Forestry (DOF), the Florida Fire Chiefs' Association (FFCA), and the Civil Air Patrol (CAP) are assigned to support ESF 4 and 9 operations.

2. References

- a. State of Florida Comprehensive Emergency Management Plan (CEMP)
- b. Department of Financial Services Coordinated Disaster Plan (DOFSCDP)
- c. Division of Forestry Fire Suppression Plan (DOFFSP)
- d. The Florida Fire Chiefs' Association Emergency Response Plan (FFCA-ERP)

(c) Operations

1. The Director, SFM, has authorized the Emergency Coordinating Officer (ECO), or authorized representative, to alert, mobilize, and deploy appropriate SFM personnel and resources to accomplish all support missions assigned to ESF 4 and 9 as outlined in Section V (Administrative Procedures). The ECO will also notify assigned representatives of DOF, FFCA, and other support agencies, of pending activation.

The ECO will also ensure the appropriate staffing level of the ESF operations room to coordinate all ESF 4 and 9 operations as Lead Agency, as well as ensuring the staffing levels of the emergency response teams (see Section V).

2. Operation Status-Response Levels. The Response Levels during emergency events will be in accordance with the Response Levels of the SEOC.
 - a. Level One – Full Scale Activation of State Emergency Response Team (SERT). In a full-scale activation, all primary and support agencies under the state plan are notified. The SEOC will be staffed by Division of Emergency Management (DEM) personnel and all ESF(s).
 - b. Level Two – Partial Activation of SERT. This is limited agency activation for all primary or lead ESF(s) that have specific mission responsibility. The SEOC will be staffed by DEM personnel and necessary ESF(s).

- c. Level Three – Monitoring Activation. Level 3 is typically a “monitoring” phase. Notification will be made to those state agencies and ESF(s) who would need to take action as part of their everyday responsibilities. The SEOC will be staffed with state warning point communicators and DEM staff.
3. Notification Procedures. DEM is responsible for notifying the SFM ECO and the Department of Financial Services Disaster Coordinator of potential/existing emergencies and disasters.
 - a. The ECO or authorized representative will notify the Director and Bureau Chiefs. The ECO will also notify DOF and FFCA of the pending need to support ESF 4 and 9 at the SEOC.
 - b. Upon notification, each SFM Bureau Chief will provide representation in the ESF 4 and 9 operations room as directed (see Section VI).
 - c. Once notified, personnel will receive direction from their designated Incident Manager (IM) for specific assignment and scheduling. IM(s) will task/organize their team as the current situation dictates, and provide team assignments to the ECO.

(d) Staffing

1. Staff representation in the ESF 4 and 9 operations room will be as directed by the ECO or authorized representative per Section VI (Administrative Operations) of this SOP.
2. ESF 4 and 9 staff will consist of personnel assigned from the SFM, and representatives from DOF, FFCA and other support agencies. Organizational and operational guidelines, and duties and responsibilities are contained in this SOP.

(e) Displacement

If the SEOC is impacted or threatened by the potential of a major disaster, DEM may elect to move to an alternate EOC site.

(6) **ADMINISTRATIVE PROCEDURES**

(a) Introduction

The SFM has primary and lead responsibility for ESF 4 and 9, in coordination and cooperation with a variety of other support agencies including DOF, FFCA, CAP, and the Florida Association of Search and Rescue (FASAR).

(b) Purpose

This guideline outlines policies, procedures and responsibilities for managing, operating, planning, and staffing the ESF 4 and 9 operations room at the SEOC.

(c) Applicability

There are a variety of disaster situations that will compel the ESF 4 and 9 operations room to be notified and/or activated, whether for limited or full activation. These include:

1. Tropical storms and hurricanes
2. Wildfires
3. Tornadoes
4. Flooding
5. Civil disturbance
6. Terrorist incidents
7. Other situations

(d) Duties and Responsibilities

The three operational levels for staffing and operations required by the SFM are:

Notification Only

Limited Operation

Full Operation

(e) Notification Only

Emergency situations that arise in which only the ECO for the SFM will be notified by the SEOC. *(These include situations in which no action is required from the SFM other than monitoring the emergency or potential emergency.)*

1. ECO
 - a. Responsible for responding to electronic pages received from the SEOC, or will have an alternate contact when not available.
 - b. Discuss the situation with the State Coordinating Officer (SCO), the SERT leader, or the duty Operations Chief at the SEOC.

- c. Contact the Incident Managers and Senior Staff of the SFM and brief them of the situation as necessary.
- d. At this time a determination will be made as to whether to activate and staff the ESF 4 and 9 operations room or continue to monitor the situation from outside the SEOC.

(f) Limited Operation

When it is determined that the ESF 4 and 9 operations room should be activated, but with a small or limited staff, a limited operation will include the following:

.....

4. Logistics

- a. The FFCA, in consultation with the ECO, will determine when the current situation requires the staffing of the logistics position within the ESF 4 and 9 operations room of the SEOC.
- b. If FFCA representatives respond from the local area, the position will be staffed within two hours. Should staffing come from outside the local area it may be 5+ hours before the position can be staffed.
- c. Until the FFCA representative arrives at the site, logistical requests involving FFCA resources will be conducted by phone through the Chair of the Emergency Response Committee or designee.
- d. Notify the Plans section of the resources immediately available and the time required to activate them to the disaster area.

.....

(h) Full Operation

There will be times when it is determined that the ESF 4 and 9 operations room should be activated with a full or expanded staff. The staff that will constitute an expanded activation may include, but not be limited to, the following:

.....

6. Logistics

- a. FFCA, in consultation with the ECO, determine when the current situation requires the staffing of the logistics position within the ESF 4 and 9 operations room at the SEOC.
- b. If FFCA representatives respond from the local area, the position will be staffed within two hours. Should staffing come from outside the local area it may be 5+ hours before the position can be staffed.
- c. Until the FFCA representative arrives at the SEOC, all logistical requests requiring FFCA resources will be conducted by phone or email through the Chair of the Emergency Response Committee or designee.
- d. Notify the Plans section of resources immediately available and the time required for deploying them to the disaster area.
- e. Provide relevant input to the ICS 214 log as appropriate.

7. Logistics Section

- a. The Logistics Chief will direct the efforts of logistics support to fill mission requests.
- b. Logistics section will assist the Logistics Chief as directed.
- c. Communicate logistic requests to the regional coordinators.

.....

(i) Mission Requests

There are a variety of ways in which a mission may be conveyed to the ESF 4 and 9 operations room. Regardless of how they originated the following are the general guidelines that will be followed:

.....

4. Logistics Chief

- a. Make contact with regional coordinators to fill mission requests.
- b. Facilitate the RFA process with Operations and with the responding agencies.
- c. Coordinate with planning supporting material, (i.e. maps etc.) that may need to be sent with the responding agencies.
- d. Ensure that the regional coordinators track all resources for each mission and send updated information to Plans.
- e. Ensure that the regional coordinators begin check-in and the tracking process for resources being deployed, to include:
 - (I) Department
 - (II) Apparatus designation and type
 - (III) Personnel names, social security numbers
 - (IV) Name of the Officer in Charge and a contact number
- f. Secure deployment information for inclusion in the mission file.

(j) Request For Assistance/Response To Assistance Request

Once a mission request has been determined to be valid by the IM, the RFA process will begin. **In cases of immediate need (life and death, imminent property loss etc.) as determined by the ECO, IM and/or the Bureau Chief, the IM may waive the completion of this process prior to the mission request being filled.** In this situation, the RFA and RTAR forms will be completed as soon as possible. If the RFA and/or the RTAR is not completed in the field, the process for completing the RFA and RTAR includes the following (See Attachments 4 and 5):

1. RFA form completion

Information necessary for completion of the RFA form may be received via the EM-2000, telephone message, fax, or email. Each of these sources may be utilized to acquire necessary information for completion of the RFA.

- a. Operations will complete all parts of section one with information currently available.

- b. Logistics will complete all parts of section two (Resources Requested) with information currently available.
- c. Administrative support will contact the requestor to obtain necessary information for completion of the request if necessary.
- d. The Logistics Chief will review the Resources Requested section for accuracy, specifically numbers and types of equipment and personnel, and confer with the IM as to the request validity. When request validity is in question, the IM, Logistics Chief and the ECO will confer with the Emergency Services Branch Chief. After establishing validity, logistics will match resources available with those requested.
- e. The Logistics Chief will then match resources available with those requested and notify operations and administrative support of the responding agency(s).

2. RTAR form completion

- a. Logistics will obtain the responder identification information to complete an RTAR for each responding agency.
- b. The Logistics Chief will review the RTAR for accuracy and confer with the IM as to response validity and to determine that it fills the established mission request.
- c. Administrative support will contact the requestor to obtain necessary information for completion of the RTAR if necessary.
- d. Logistics will notify resources to respond and obtain deployment times and locations.
- e. Planning will begin resource tracking with specific emphasis on resource demobilization requirements.
- f. At the time of demobilization, administrative support will complete the demobilization time field on the RFA, RTAR, and in the ESF 4 and 9 mission database.
- g. Administrative support will ensure all sections of the RFA and RTAR are completed and filed with appropriate mission documents.

.....

(8) SEARCH AND RESCUE INCIDENTS

(a) Overview

Within the State of Florida there are a variety of search and rescue organizations that include the following types of search and rescue components:

1. Canine Teams
2. Equine Teams
3. Water Rescue Teams
4. Swift Water Teams
5. Urban Teams

SFM is the State Coordinating Agency for ESF 9, Search and Rescue. FASAR will support the SFM by assisting with logistics in SAR activations. Liaisons to FASAR will be maintained with the Sheriffs' Association, Florida Wildlife Conservation Commission, Civil Air Patrol (CAP) and the Coast Guard to ensure coordination of efforts when conducting independent or joint SAR missions.

FASAR has three representatives in each of the seven emergency management areas of the State. These representatives from the seven areas of the state function as a statewide steering or oversight committee for FASAR.

(b) Requests for SAR resources and/or SAR teams

FASAR has established SOP(s) for team activation and notifications. When a request is received for search and rescue teams and the mission is approved, the following procedure is followed for resource activation:

1. Follow procedures established in Section A.
2. Determine from the requestor the specific mission request, urban search, wilderness search, standing water or swift water search.
3. Contact with the FFCA State Emergency Response Coordinator and assign the mission request.
4. FFCA will facilitate the request through the FASAR structure, FFCA will then report back to ESF 9 what personnel and support equipment is available to deploy.
5. ESF 9 will complete the request for assistance paperwork, issue the ESF 9 mission number, track and demobilize the request as per this SOP.
