FACTS Contract/Grant Disbursement Information Batch File Format User Guide

Introduction:

An agency can consider using one of the two following options to upload data into the Florida Accountability Contract Tracking System (FACTS).

The first option, also referred to as the **User Interface Batch** process, is for agencies that are familiar with Microsoft Excel and have a large number of contract/grant disbursement records to load. Agencies must have the ability to save the Microsoft Excel worksheet into a file format easily processed by the FACTS web application. Once the Agency user has verified and updated the file for required data, the Excel spreadsheet with contract data is saved in the format and with the prescribed file name that the FACTS web application can process. The user then logs into the FACTS website and can select the upload option to upload the data. This requires that the Agency user have a sFTP user name and password provided by FACTS.Info@MyFloridaCFO.com.

The second option, also referred to as the **Agency Batch Transmission** process, is used when the agency has a high volume of contract/grant disbursement records (hundreds or more) and is looking for a technical FACTS web application loading solution. The agency will generate a "Batch" file in the format and with the prescribed file name that the FACTS web application can process at the Agency and transmit it through a sFTP to the FACTS web application. This requires the agency to request a sFTP account through FACTS.Info@MyFloridaCFO.com.

Agency Assumptions:

Agencies should adhere to the following assumptions.

1. The Agency has identified their Agency's Point of Contact (POC) and Technical Point of Contact (TPOC)
2. The Agency has obtained user ID and password to log into the FACTS web application for Direct Data Entry.
3. The Agency has a Microsoft Excel version that allows users to import and export text files. Minimum requirement is Microsoft Operating System Windows XP – contact Agency technical staff if using earlier versions of Microsoft Operating System and software
4. The Agency has secure File Transfer Protocol (sFTP) software to retrieve and transmit data files (required for Agency Batch Transmission only). Contact agency technical staff if using earlier versions of Microsoft Operating System and software or if not familiar with sFTP software.
5. The Agency has requested a secure File Transfer Protocol (sFTP) account through FACTS.Info@MyFloridaCFO.com to retrieve and transmit data, if this option is selected for the agency.

References:

Agencies should utilize the following additional documents to support FACTS processes.

1. Department of Financial Services FACTS Code Validation Tables
2. Department of Financial Services FACTS User Manual

Department of Financial Services

FACTS Contract/Grant Disbursement Information Batch File Format User Guide

User Interface Batch:

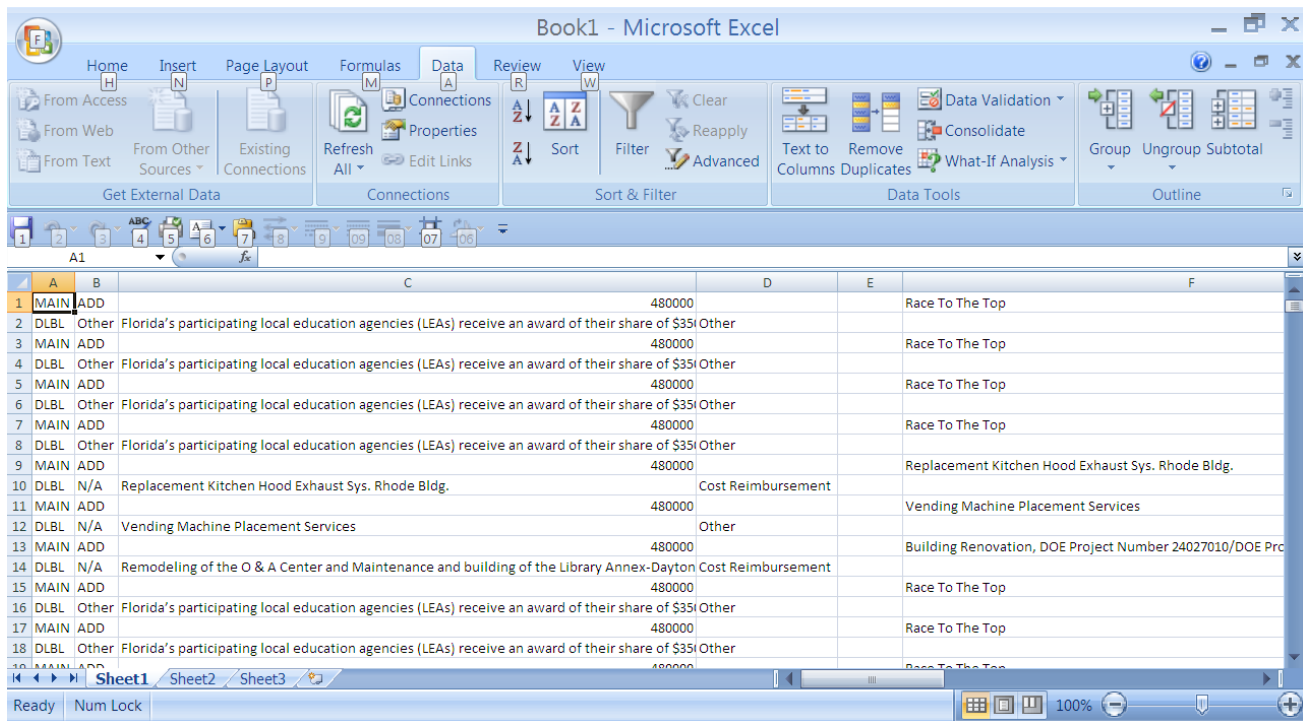

FACTS expects the batch data in one delimited flat file. The column delimiter is a “|” (one pipe) and the new line / row delimiter is a carriage return.

When using Microsoft Excel to create the batch file the data must be entered in the spreadsheet as follows for each contract/grant disbursement agreement:

- Row 1 - MAIN = Contract/Grant Disbursement Agreement
- Row 2 - CTCH = Contract/Grant Disbursement Agreement Change/Amendment, if applicable
- Row3 - BUGT = Budget Info, if applicable
- Row 4 - VNDR = Vendor Info, if applicable
- Row 5 - DLBL = Deliverable Info, if applicable
- Row 6 - CSFA = CSFA Info, if applicable
- Row 7 - CFDA = CFDA Info, if applicable

Refer to the Contract/Grant Disbursement Agreement Batch Import File Format tables below for field/column data requirements for each row.

Each time record type of “MAIN” is encountered, FACTS records one contract/grant disbursement agreement record and its associated children records / row (CTCH, BUGT, VNDR, DLBL, CSFA, and CFDA). There does not have to be all the different children records /rows for each “MAIN”, however, all the fields/columns for each children record used must be in the spreadsheet even if it contains blanks.

Department of Financial Services

FACTS Contract/Grant Disbursement Information Batch File Format User Guide

Some of the data entered in the spreadsheet are FACTS codes. Refer to FACTS Code Validation Tables.

Loading Steps:

- A. Once the spreadsheet data is verified, save the file in the format and with the prescribed file name "Batch_OLO number_date code" (e.g. Batch_830000_2012_03_31) so the FACTS web application can process.

In order to save the Excel file in the required format, some Windows settings may need to be changed:

1. Access the Control Panel.
2. Double click the "Regional and Language Options" icon.
3. When the "Regional and Language Options" dialog box appears, click "Customize."
4. When the "Customize Regional Options" dialog box changes, click the "Numbers" tab; enter the "Pipe" character in the "Line separator" field (Hold Shift key and press the "Back Slash" (\) key) and click "Apply."
5. Note: After saving the data file in the prescribed text format you may want to change the "List separator" setting back to the comma ",".
6. When the next dialog box appears click "OK."
7. Back at the Excel sheet click "Save As; Other Formats."
8. When the "Save As" dialog box appears, enter the prescribed file name (e.g. Batch_OLO Number_YYYY_MM_DD); then select CVS (Comma delimited) in the "Save as type:" field; click "Save."
9. When the next dialog box appears, click "Yes."

The saved file will look like this when opened with Microsoft Notepad.

- B. Access the FACTS web application dashboard, select the Upload Contract/Grant Disbursement Info option to upload the agency contract/grant disbursement data and follow the on screen instructions.

Department of Financial Services

FACTS Contract/Grant Disbursement Information Batch File Format User Guide

- C. The Agency will receive a confirmation that the file was transmitted successfully or a notification of errors. If an error is encountered in saving the Agency Batch data load, investigate and resubmit the file prior to 5 PM.
- D. All Batch data load files will be processed between the hours of 5:00 PM and 6:45 PM. The information will be validated and loaded into the FACTS website database. If an error is encountered it will be written in an output log file and placed on the error screen of the web application.
- E. Essential information is passed through as second batch loading processes to FLAIR. If errors are encountered these errors will be captured in the same output log file described in the earlier paragraph.
- F. Valid data loaded under the batch process will be in FLAIR within 24 hours from the time the web system process the batch file. Loading processes are scheduled to run on regular working days.
- G. All errors encountered during the batch process will be posted by 5 AM the next business day and be accessed using the FACTS web application dashboard option View Upload History.

Agency Batch Transmission:

FACTS expects the batch data for Contracts/Grant Disbursement Agreements in one delimited flat file. The column delimiter is a “|” (one pipe) and the new line / row delimiter is a carriage return.

- This file contains the “Main” Contract/Grant Disbursement Agreement record (One to One data relationship – data not repeated for a contract/grant disbursement agreement) and then all the children records (One to Many relationship – data may be repeated for a contract/grant disbursement agreement) just after the “Main” record.
- The contract/grant disbursement agreement “Change” record (if any) follows the “Main” record. The other children records can be in any order after the “Main” but must be grouped together. Each “Main” record indicates another contract/grant disbursement agreement.
- When updating/adding any of the Vendor, Budget, Deliverable, CSFA, CFDA children records, provide the entire appropriate children record set for the contract/grant disbursement agreement preceded by a “Main” record containing at a minimum Agency ID, FLAIR Id and Action.

Loading Steps:

- A. Configure the agencies local system to export data according to the format in the Contract/Grand Disbursement Agreement Batch Import File Format Tables FACTS File Format for Agencies document. Remember to save the file with the proper format and naming convention, “Batch_OLO number_date code” (e.g. Batch_830000_2012_03_31).
- B. Transmit the batch file with the Agency’s sFTP client software, user name and password provided by FACTS.Info@MyFloridaCFO.com.
- C. The sFTP client will provide a confirmation that the file was transmitted successfully or a notification that an error occurred. If an error was experienced in saving the Agency Batch data load, investigate and resubmit prior to 5 PM.
- D. All Batch data load files will be processed between the hours of 5:00 PM and 6:45 PM. The information will be validated and loaded into the FACTS website database. If an error is encountered it will be written in an output log file and placed on the error screen of the web application.

Department of Financial Services

FACTS Contract/Grant Disbursement Information Batch File Format User Guide

- E. Essential information is passed through as a second batch loading process to FLAIR. If errors are encountered the errors will be captured in the same output log file described in the earlier paragraph.
- F. Valid data loaded under the batch process will be in FLAIR within 24 hours from the time the web system processes the batch file. Loading processes are scheduled to run on regular working days.
- G. All errors encountered during the batch process will be posted by 5 AM the next business day.

Contract/Grant Disbursement “Change”/Amendment Information Record

Provide only the “Change” records that need to be added or updated. For example if a contract/grant disbursement agreement has three Changes/Amendments, and there is an update in the second previously submitted “Change” record then only the updated “Change” record needs to be provided.

For any updates, the “Agency Amendment Reference” must exist in FACTS for the contract/grant disbursement agreement. “Agency Amendment Reference” must be unique for a contract/grant disbursement agreements’ FLAIR Contract ID.

Data Element Name/Detail	Type	Size	Allowed values (in case of code values)	Required	Comments
Record Type	Text	4	“CTCH”	Yes	Always pass this value for Contract/Grant Disbursement Agreement Change Information
Action	Text	3	“ADD” – Adding a new Contract/Grant Disbursement Agreement Change “UPD” – Updating an existing Contract/Grant Disbursement Agreement Change	Yes	
Contract/Grant Disbursement Agreement Change Type	Text	1	“A” = Amendment “E” = Extension “R” = Renewal	Yes	
Amendment Amount	Numeric	13.2		Yes	
Agency Amendment Reference	Text	8		Yes	
Amendment Effective Date	Date (YYYY-MM-DD)	8		Yes

“CSFA” Information Record

Data Element Name/Detail	Type	Size	Allowed values (in case of code values)	Required	Comments
Record Type	Text	4	“CSFA”	Yes	Always pass this value for CSFA Information
CSFA Code	Text	5	Please see FACTS Code Validation Tables for code details. Format (#####)	Yes	<i>This should be a valid FLAIR CSFA code. This will be validated.</i>

Contract’s “CFDA” Information Record

Data Element Name/Detail	Type	Size	Allowed values (in case of code values)	Required	Comments
Contract Record Type	Text	4	“CFDA”	Yes	Always pass this value for CFDA Information
CFDA Code	Text	6	Please see FACTS Code Validation Tables for code details. Format (##.###)	Yes	<i>This should be a valid FLAIR CFDA code. This will be validated.</i>

Error File Information

Import (Uploaded) files will be processed nightly. The results will be returned by an error log available either through the FTP or FACTS View Upload History dashboard functions.

Records that did not contain an error will not be placed into the file. Records that resulted in an error will be placed into the file in their entirety with the exception of Contract Manager Information which will be blanked out.

Error logs will use the following naming convention:

FilenameReceived_YYYYMMDD_HHMMSS_Log.txt

The resulting error record will be formatted as:

Error: Error Description | Delimited record received

Department of Financial Services

FACTS Contract/Grant Disbursement Information Batch File Format User Guide

In cases where the “Main” record results in an error, children records for that “Main” record will not be processed and will be put into the error log file with the error description that their “Main” contract/grant disbursement agreement record had errors.

FACTS Code Validation Tables

Reference the FACTS Validation Tables for details.
