Introduction

Section 218.33, Florida Statutes (F.S.), states “Each local governmental entity shall follow uniform accounting practices and procedures as promulgated by rule of the department to assure the use of proper accounting and fiscal management by such units. Such rule shall include a uniform classification of accounts.” Additionally, Section 218.32, F.S., requires that each local government reporting entity submit annual financial information to the Department of Financial Services.

The Department of Financial Services, assisted by representatives of various local governments, developed the Uniform Accounting System Chart of Accounts to be used as the standard for recording and reporting financial information to the State of Florida. Implementation of the standard Chart of Accounts and Standard Annual Reporting Form began in 1978. Since then, there have been minor changes and updates to the Chart of Accounts and the Annual Reporting Form.

As mandated by Section 218.33, F.S., reporting units should use this chart of accounts as an integral part of their accounting system so that the preparation of their annual financial reports will be consistent with other local reporting entities. This does not preclude local entities from maintaining more detailed records for their own use.

In accordance with generally accepted principles, governmental accounting systems are organized and operated on a fund basis. However, due to the inflexibility, complexity and expense involved in the administration of a large number of funds, only a minimum number consistent with legal and operational requirements should be established by the local unit. Separate bank accounts are not necessary for funds. Centralized bank accounts which are reconciled to separate cash statements for each fund will maintain cash control over each fund.

The classification of funds shown below is required to be used by all reporting entities. The coding scheme that is provided with the classification of funds is optional and may be altered to meet the specific needs of the reporting entities. For example, if a reporting entity has less than ten funds of any one type, a two digit fund number may be used.

¹ Although GASB Statement 34 eliminated the general capital assets and general long-term debt account groups, local governments may still use the groups and related accounts for accounting purposes.
The coding scheme allows for up to 99 different funds in each type. The general fund category however, allows for only one fund, coded as 001. This coding system allows the data in each fund to be “rolled up” or combined with every other fund of that category. For example, if a reporting entity maintains 23 special revenue funds numbered 101 to 123, these funds may be combined for reporting purposes into one control category, “100" - special revenue funds.

In the context of the Uniform Accounting System, a fund may be defined as an independent fiscal and accounting entity consisting of a self-balancing set of accounts for recording cash and/or other assets together with related liabilities, reserves and equities segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with certain defined regulations, restrictions and limitations.

Balance Sheet Account Introduction

The following list of balance sheet accounts represents the reporting level. More detailed classifications may be made by the reporting entity within the accounts listed.

The first four digits of the six-digit balance sheet account code are required. The remaining digits may be assigned at the discretion of the reporting entity.

The balance sheet accounts are arranged into two major groups: (1) Assets, Other Debits and Deferred Outflow and, (2) Liabilities, Other Credits and Deferred Inflow. However, there are accounts with credit balances included in the Assets and Other Debits category in order to present the accounts in typical balance sheet order. For example, Account 163, Accumulated Depreciation-Buildings, appears among the assets even though it has a credit balance, because on the balance sheet it usually follows Account 162, Buildings.

280.000 FUND BALANCE – NONSPENDABLE

Nonspendable fund balance includes amounts that are not in a spendable form (inventory, for example) or are required, either legally or contractually, to be maintained intact (i.e. the principal of an endowment fund).

- Inventories
- Prepaid Items
- Long-Term Loans and Notes Receivable
- Corpus of a Permanent Fund

Reference GASB Statement No. 54

281.000 FUND BALANCE – RESTRICTED
Restricted fund balance includes amounts that can be spent only for the specific purposes stipulated by external resource providers (i.e., grant providers, creditors, contributors, or laws or regulations of other governmental entities), constitutionally, or through enabling legislation (that is, legislation that creates a new revenue source and restricts its use). Effectively, restrictions may be changed or lifted only with the consent of resource providers.

Reference GASB Statement No. 54

282.000 FUND BALANCE – COMMITTED

Committed fund balance includes amounts that can be used only for the specific purposes determined by a formal action of the government’s highest level of decision-making authority. Commitments may be changed or lifted only by the government taking the same formal action that imposed the constraint originally (i.e., legislation, resolution, or ordinance). Contractual obligations should be incorporated to the extent that existing resources in the fund have been specifically committed for use in satisfying those contractual obligations. Encumbrances approved by action of the highest decision making authority (board approved construction contract with XYZ company) should be reported as committed.

Reference GASB Statement No. 54

283.000 FUND BALANCE – ASSIGNED

Assigned fund balance comprises amounts intended to be used by the government for specific purposes. Intent can be expressed by the governing body or by an official or body to which the governing body delegates the authority. In governmental funds other than the general fund, assigned fund balance represents the amount that is not restricted or committed. This indicates that resources in other governmental funds are, at a minimum, intended to be used for the purpose of that fund. An appropriation of existing fund balance to eliminate a projected budgetary deficit in the subsequent year’s budget in an amount no greater than the projected excess of expected expenditures over expected revenues satisfies the criteria to be classified as an assignment of fund balance. Encumbrances resulting from issuing purchase orders as a result of normal purchasing activities approved by appropriate officials should be reported as assigned.

Reference GASB Statement No. 54

284.000 FUND BALANCE – UNASSIGNED

Unassigned fund balance is the residual classification for the general fund and includes all amounts not contained in the other classifications. Unassigned amounts are technically available for any purpose. If another governmental fund has a fund balance
deficit, then it will be reported as a negative amount in the unassigned classification in that fund. Positive unassigned amounts will be reported only in the general fund.

Revenue Accounts
Revenue Account Introduction

Revenues of a local government should be classified by fund and source to provide the information necessary to (1) prepare and control the budget, (2) record the collection of revenues, (3) prepare financial statements and schedules and (4) prepare financial statistics. The local government is responsible for recording and reporting each revenue item in the revenue account titles prescribed herein. More specific levels of detail may be added to the account structure as long as no new classifications are used.

The Uniform Accounting System provides a revenue account code consisting of nine digits; the first three identify the fund while the following six are used to further identify the revenue source.

Example:

\[
\begin{align*}
\text{Revenue Account Code} & \\
101 - 331.200 & \\
\text{Fund Identifier} & \\
11 & \\
\text{Incorp/Unincorp County Areas} & \\
\end{align*}
\]

Section 129.01, F.S., requires all counties to separate locally raised revenues between the incorporated and unincorporated areas of the county. In order to provide a mechanism to make this separation, a one or two digit code is added to the end of the UAS revenue account codes for all counties. A one-digit code provides a code for each area when there are nine or fewer areas. If there are more than nine and less than ninety-nine areas, a two digit code is necessary.

Example:

\[
\begin{align*}
\text{Revenue Account Code} & \\
101 - 331.200.11 & \\
\text{Fund Identifier} & \\
\text{Incorp/Unincorp County Areas} & \\
11 & \\
\end{align*}
\]

So, counties must use an eleven digit revenue account code if it includes both incorporated and unincorporated areas while all other local government entities must use a nine digit revenue account code.
Revenue Account Codes

3 | x | x | . | x | x | x - REVENUE

Revenues may be operationally defined in a governmental fund accounting context as “all increases in fund net assets except those arising from inter-fund reimbursements, inter-fund operating and residual equity transfers or long-term debt issues.”

• **Municipal Parking Facility Space Surcharges**

  Certain municipalities are authorized to impose and collect parking facility space surcharges. These discretionary per-vehicle surcharges are calculated as a percentage of the amounts charged for the sale, lease, or rental of space at
municipal parking facilities that are open to the public. The proceeds are used to reduce the municipality’s ad valorem tax millage rate, eliminate non-ad valorem assessments, or improve transportation in downtown or urban core areas. The surcharge shall be up to 15 percent of the amount charged for the sale, lease, or rental of space at municipal parking facilities that are open for use to the general public and which are not airports, seaports, county administration buildings, or other projects as defined under Sections 125.011 and 125.015, F.S.\(^5\)

Eligible Entities include: The governing body of any municipality with a population of 200,000 or more, more than 20 percent of the real property of which is exempt from ad valorem taxation, and which is located in a county having a population greater than 500,000 may impose and collect, subject to referendum approval by voters in the municipality, a discretionary per-vehicle surcharge. Based on April 1, 2006 official population estimates, only six municipalities (i.e., Hialeah, Jacksonville, Miami, Orlando, Saint Petersburg, and Tampa) had a population of 200,000 or more and were located in a county having a population greater than 500,000. Currently, it is not known which of these six municipalities have more than 20 percent of its real property exempt from ad valorem taxation and impose the surcharge.

- PERMITS, FEES AND SPECIAL ASSESSMENTS\(^6\)

Under Florida’s Constitution, local governments possess strong home rule powers. Given these powers, local governments may utilize a variety of revenue sources for funding services and improvements without express statutory authorization. Franchise fees, impact fees, special assessments, and user fees are examples of these home rule revenue sources.

In implementing fee programs and special assessments, a local government’s goal is to create an assessment or fee that avoids classification as a tax by the courts. If an assessment or fee does not meet the case law requirements and is classified as a tax, then the local government must have general law authorization for its imposition.

\(^5\) Introduction is from page 145 of the Florida Legislative Committee on Intergovernmental Relations’ 2007 Local Government Financial Information Handbook

\(^6\) Introduction from page 19 of the Florida Legislative Committee on Intergovernmental Relations’ 2007 Local Government Financial Information Handbook
Special assessments and taxes are distinguishable because no requirement exists that taxes provide a specific benefit to property. Taxes are levied for the general benefit of residents and property. As established in Florida case law, two requirements exist for the imposition of a valid special assessment. First, the property assessed must derive a special benefit from the improvement or service provided; and second, the assessment must be fairly and reasonably apportioned among the properties that receive the special benefit.

A special assessment may provide funding for either capital expenditures or the operational costs of services, provided that the property that is subject to the assessment derives a special benefit from the improvement or service. Examples of assessed services and improvements upheld by Florida courts include garbage disposal, sewer improvements, fire protection, fire and rescue services, street improvements, parking facilities, downtown redevelopment, storm water management services, and water and sewer line extensions.

Florida’s local governments possess the home rule authority to impose a variety of proprietary and regulatory fees to pay the cost of providing a service or facility or regulating an activity. Proprietary fees are imposed pursuant to the assertion of a local government’s exclusive right. Examples of such proprietary fees include franchise fees, user fees, and utility fees. Regulatory fees are imposed under the police power in the exercise of a local government’s sovereign power. Examples of such regulatory fees include building permit fees, impact fees, inspection fees, and storm water fees. The underlying premise for both types of fees is that local governments may charge, in a reasonable and equitable manner, for the facilities and services they provide or regulate.

In summary, the exercise of home rule powers by local governments is constrained by whether an inconsistent provision or outright prohibition exists in the constitution, general law, or special law regarding the power at issue. Counties and municipalities cannot levy a tax without express statutory authorization because the constitution specifically prevents them from doing so. However, local governments may levy fees and special assessments absent any general law prohibition provided the fee or assessment meets the relevant legal sufficiency tests.

322.000 BUILDING PERMITS (Building Permit Fees)

Under Florida’s Constitution, local governments possess home rule powers and may therefore; utilize a variety of revenue sources for funding services and improvements without express statutory authorization. Building Permit Fees are a type of regulatory fee imposed pursuant to the local government’s police powers in the exercise of its sovereign functions. The imposed fee cannot exceed the cost of the
regulatory activity, and the fee is generally required to be applied solely to pay the cost of the regulatory activity for which it is imposed.

323.xxx - FRANCHISE FEES

Franchise Fees are a type of proprietary fee imposed based on the assertion that local governments have the exclusive legal right to impose such fees. The imposed fee must be reasonable in relation to the privilege or service provided by the local government, or the fee payer receives a special benefit from the local government. Local governments may impose a fee upon a utility for the grant of a franchise and the privilege of using local government’s rights-of-way to conduct the utility business. This franchise fee is considered fair rent for the use of such rights-of-way and consideration for the local government’s agreement not to provide competing utility services during the franchise term.

- **County Revenue Sharing Program**

  The Florida Revenue Sharing Act of 1972 was a major attempt by the Legislature to ensure a minimum level of revenue parity across units of local government. An allocation formula is used to distribute 2.9 percent of net cigarette tax collections and 2.044 percent of sales and use tax collections among the qualifying counties. County population, unincorporated county population, and county sales tax collections are used in the formula to determine each county’s portion.

  Eligible Entities include: All Counties are eligible to receive the minimum entitlement amount

STATE REVENUE SHARING - INSURANCE LICENSE TAX
(AKA INSURANCE AGENTS COUNTY LICENSES)

County governments receive proceeds from an annual license tax on the original appointment and renewal of insurance representatives and agents selling various types of insurance products. The county tax portion is either $6 or $12 per original appointment or renewal. The county tax shall be paid by each insurer for each agent only for the county where the agent resides. If the agent’s place of business is located in a county other than that of residence, then the county tax is paid based on where the place of business is located. If an agent maintains a place of business in more than one county, the county tax shall be paid by each insurer for each county where the agent represents the insurer and has a place of business. A county tax of $3 per year shall be paid by each insurer for each county in this state in which an agent who resides outside of this state represents and engages in person in the activities of an agent for the insurer.

Municipal governments may also require a tax on insurance agents not to exceed 50 percent of the applicable state tax. This tax may apply only to those agents having business offices within the municipal jurisdiction. If no such office is required, the tax may be required by the municipal government where the agent’s place of residence is located. An authorized use of the proceeds of the county or municipal tax is not specified in current law.

Eligible Entities include: County and Municipal Governments A county government will receive proceeds if an agent does business within the county or has a business office located within the county. A municipal government may receive proceeds if an agent’s office is located within the municipal jurisdiction or the agent’s place of residence is located within the municipal jurisdiction if no office is required.

Expenditure/Expense Account Introduction

Expenditures are defined in a governmental fund accounting context as all decreases in fund net assets - for current operations, capital outlay or debt service - except those arising from operating and residual equity transfers to other funds.

Expenditures are classified by fund, organizational unit, function, activity and object. Furthermore, it is the intent of the Legislature that units of local government summarize their financial data in a functionally equivalent manner in order to facilitate comparison and analysis. The classification of expenditures has been developed to fulfill this requirement and to meet the external and internal reporting needs of local governments.

The Uniform Accounting System provides an expenditure code consisting of twelve digits, three for the fund, four for the identification of department and division and five to identify the transaction and other specific information.

Example:

```
101  –  21  32  –  521 . 40
```

Section 129.01, F.S., requires all counties to separate expenditures between the incorporated and unincorporated areas of the county. In order to provide a mechanism to make this separation, a one or two digit code is added to the expenditure accounts for all counties. A one-digit code provides a code for each area when there are nine or fewer areas. If there are more than nine and less than ninety-nine areas, a two digit code is necessary.

Example:

```
101  –  21  32  –  521 . 40 . 11
```

101 = Special Revenue Fund

521.40 = Law Enforcement – Travel & Per Diem

11 = County Specific Incorp/Unincorp Indicator
So, counties must use a fourteen digit expenditure/expense account code if it includes both incorporated and unincorporated areas while all other local government entities must use a twelve digit account code. The Uniform Accounting System does not provide the cost allocation system, which is necessary to make the required separation of expenditures between the incorporated and unincorporated areas. A cost allocation system will have to be developed individually for each county to provide reasonably accurate separation of expenditures in satisfying the requirements of Chapter 129, F.S.
Expenditure/Expense Account Codes

5 xx xx xx xx xx - EXPENDITURES/EXPENSES

The term “expenditures,” whether used in connection with the accrual or the modified accrual basis of accounting, denotes the cost of goods delivered or services rendered (whether paid or unpaid) including expenses, capital outlays and the provisions for debt retirement where such debt is not reported as a liability of the fund from which it was retired. Each expenditure should be analyzed and classified individually by transaction code, and object regardless of the organizational unit incurring it. Cost allocation may be necessary where material amounts of expenditures for a single organization unit cross function-activity lines.

Budgetary Financial Reporting and Disclosure Guidelines

1. Chapter 129, F.S., establishes guidelines for the preparation, adoption and amendment of county budgets. Section 129.01(1), F.S., requires the preparation, approval, adoption and execution of an annual budget, which controls the levy of taxes and the expenditure of money for all county purposes. The budget must be balanced; that is, the total of the estimated receipts, including balances brought forward, must equal the total of appropriations and reserves. Similar provisions are included in Sections 166.241(2) and 189.418(3), F.S., for municipalities and special districts, respectively.

2. Pursuant to Governmental Accounting Standards Board (GASB) Codification Section 2400.102, local governmental entity financial statements prepared in accordance with Section 218.39(2), F.S., must include a Statement of Revenues, Expenditures and Changes in Fund Balance - Budget and Actual for all governmental fund types for which annual budgets have been adopted pursuant to Sections 129.01(2)(b), 166.241(2), and 189.418(3), F.S. The minimum budget-basis presentation required for the financial statements is the aggregation by fund type of the appropriated budget adopted by the local governmental entity’s governing body.

3. GASB Codification Section 2400.111 states that for budgetary reporting purposes it is desirable to provide note disclosure of the degree to which the reporting entity’s financial operations are subject to a comprehensive “appropriated budget,” “non-appropriated budget,” or are non-budgeted financial activities. Accordingly, local governmental entity financial statements prepared in accordance with Section 218.39(2), F.S., should include notes to financial statements, which disclose both the legal level of budgetary control and, if applicable, more detailed levels of budgetary control established for management purposes. The legal level of budgetary control is the level of control established in the appropriated budget approved by the local governmental entity’s governing body.

4. GASB Codification Section 2300.106h requires that the notes to the financial statements disclose material violations of finance-related legal and contractual provisions. If budget over-expenditures occur at the legal level of budgetary control that are material in relation to a local governmental entity’s financial statements prepared in accordance with Section 218.39(2), F.S., the notes to financial statements should disclose that such budget expenditures are contrary to law.

5. GASB Codification Section 2300.106n requires that the notes to the financial statements disclose any excess of expenditures over appropriations in individual funds. If budget over-expenditures occur at the legal level of budgetary control in individual funds that are not apparent from a local governmental entity’s financial statements prepared in accordance with...
Section 218.39(2), F.S., the notes to the financial statements should disclose the budget over-expenditure amounts by individual fund.
