CLIMB, Children Learning the Importance of Money Basics, is CFO Jimmy Patronis' newest financial literacy program for youth ages 10 and under. This online adventure tells the story of Sammie, the Saving Scottie, through a series of animated videos as he learns the basics of money management. Topics include budgeting, saving and the difference between needs and wants. The Department's goal is to help start the conversation about money basics, while making it fun and engaging for Florida's early learners.
