INTRODUCTION

Section 218.33, Florida Statutes (F.S.), states that the Department of Financial Services “...shall make such reasonable rules and regulations regarding uniform accounting practices and procedures by local governmental entities in this state, including a uniform classification of accounts, as it considers necessary to assure the use of proper accounting and fiscal management techniques by such units.” Additionally, Section 218.32, F.S., requires that each local government reporting entity submit annual financial information to the Department of Financial Services.

The Department of Financial Services, assisted by representatives of various local governments, developed the Uniform Accounting System Chart of Accounts to be used as the standard for recording and reporting financial information to the State of Florida. Implementation of the standard Chart of Accounts and Standard Annual Reporting Form began in 1978. Since then, there have been minor changes and updates to the Chart of Accounts and the Annual Reporting Form.

As mandated by Section 218.33, F.S., reporting units should use this chart of accounts as an integral part of their accounting system so that the preparation of their annual financial reports will be consistent with other local reporting entities. This does not preclude local entities from maintaining more detailed records for their own use.
CLASSIFICATION OF FUNDS

In accordance with generally accepted principles, governmental accounting systems are organized and operated on a fund basis. However, due to the inflexibility, complexity and expense involved in the administration of a large number of funds, only a minimum number consistent with legal and operational requirements should be established by the local unit. Separate bank accounts are not necessary for funds. Centralized bank accounts which are reconciled to separate cash statements for each fund will maintain cash control over each fund.

The classification of funds shown below is required to be used by all reporting entities. The coding scheme that is provided with the classification of funds is optional and may be altered to meet the specific needs of the reporting entities. For example, if a reporting entity has less than ten funds of any one type, a two digit fund number may be used.

*Although GASB Statement 34 eliminated the general capital assets and general long-term debt account groups, local governments may still use the groups and related accounts for accounting purposes.

The coding scheme allows for up to 99 different funds in each type. The general fund category, however, allows for only one fund, coded as 001. This coding system allows the data in each fund to be "rolled up" or combined with every other fund of that category. For example, if a reporting entity maintains 23 special revenue funds numbered 101 to 123, these funds may be combined for reporting purposes into one control category, "100" - special revenue funds.

In the context of the Uniform Accounting System, a fund may be defined as an independent fiscal and accounting entity consisting of a self-balancing set of accounts for recording cash and/or other assets together with related liabilities, reserves and equities segregated for the purpose of carrying on

Any assets or liabilities remaining in a clearing account at the balance sheet date will be reported on the financial statements of the fund serviced by the clearing fund (general, special revenue, etc.).

The first four digits of the six-digit balance sheet account code are required. The remaining digits may be assigned at the discretion of the reporting entity.

The balance sheet accounts are arranged into two major groups: (1) Assets and Other Debits and (2) Liabilities and Other Credits. However, there are accounts with credit balances included in the Assets and Other Debits category in order to present the accounts in typical balance sheet order. For example, Account 163, Accumulated Depreciation-Buildings, appears among the assets even though it has a credit balance, because on the balance sheet it usually follows Account 162, Buildings.

More specific levels of detail may be added to the account structure as long as no new classifications are used.
REVENUE ACCOUNTS

The Uniform Accounting System provides a revenue code consisting of nine digits; the first three identify the fund and the following six are used for more specific identification.

Fund identification (special revenue fund)

\[
\begin{array}{c}
\text{Incorporated area} \\
1 0 1 - 3 3 1 . 2 0 0 . 1 1
\end{array}
\]

Transaction code (revenue)

Section 129.01, F.S., requires all counties to separate locally raised revenues between the incorporated and unincorporated areas of the county. In order to provide a mechanism to make this separation, a one or two digit code is added to the revenue accounts for all counties. A one-digit code provides a code for each area when there are nine or fewer areas. If there are more than nine and less than ninety-nine areas, a two digit code is necessary.

3XX.XXX  REVENUE

Revenues may be operationally defined in a governmental fund accounting context as “all increases in fund net assets except those arising from interfund reimbursements, interfund operating and residual equity transfers or long-term debt issues.”

31X.XXX  TAXES

EXPENDITURE/EXPENSE ACCOUNTS

Expenditures are defined in a governmental fund accounting context as all decreases in fund net assets - for current operations, capital outlay or debt service - except those arising from operating and residual equity transfers to other funds.

Expenditures are classified by fund, organizational unit, function, activity and object. Furthermore, it is the intent of the Legislature that units of local government summarize their financial data in a functionally equivalent manner in order to facilitate comparison and analysis. The classification of expenditures has been developed to fulfill this requirement and to meet the external and internal reporting needs of local governments.

The Uniform Accounting System provides an expenditure code consisting of twelve digits, three for the fund, four for the identification of department and division and five to identify the transaction and other specific information.

Fund identification (special revenue fund)

| 104 -- | 21 | 32 -- | 5 | 2 | 1 | 4 | 0 | 11 |

\[\text{Incorporated Area}\]

| \[\text{Object/sub-object (travel)}\]

| \[\text{Transaction code (expenditures)}\]

| \[\text{Division identification}\]

| \[\text{Department identification}\]

Section 129.01, F.S., requires all counties to separate expenditures between the incorporated and unincorporated areas of the county. In order to provide a mechanism to make this separation, a one or two digit code is added to the expenditure accounts for all counties. A one-digit code provides a code for each area when there are nine or fewer areas. If there are more than nine and less than ninety-nine areas, a two digit code is necessary. The Uniform Accounting System does not provide the cost allocation system, which is necessary to make the required separation of expenditures between the incorporated and unincorporated areas. A cost allocation system will have to be developed individually for each county to provide reasonably accurate separation of expenditures in satisfying the requirements of Chapter 129, F.S.
EXPENDITURE/EXPENSE ACCOUNTS

5XX.XX EXPENDITURES/EXPENSES

The term “expenditures,” whether used in connection with the accrual or the modified accrual basis of accounting, denotes the cost of goods delivered or services rendered (whether paid or unpaid) including expenses, capital outlays and the provisions for debt retirement where such debt is not reported as a liability of the fund from which it was retired. Each expenditure should be analyzed and classified individually by transaction code, and object regardless of the organizational unit incurring it. Cost allocation may be necessary where material amounts of expenditures for a single organization unit cross function-activity lines.

1. Chapter 129, F.S., establishes guidelines for the preparation, adoption and amendment of
BUDGETARY FINANCIAL REPORTING AND DISCLOSURE GUIDELINES

county budgets. Section 129.01(1), F.S., requires the preparation, approval, adoption and execution of an annual budget, which controls the levy of taxes and the expenditure of money for all county purposes. The budget must be balanced; that is, the total of the estimated receipts, including balances brought forward, must equal the total of appropriations and reserves. Similar provisions are included in Sections 166.241(3) and 218.34(1), F.S., for municipalities and special districts, respectively.

2. Pursuant to Governmental Accounting Standards Board (GASB) Codification Section 2400.102, local governmental entity financial statements prepared in accordance with Section 218.321(1), F.S., must include a Statement of Revenues, Expenditures and Changes in Fund Balance - Budget and Actual for all governmental fund types for which annual budgets have been adopted pursuant to Sections 129.01(1), 166.241(3), and 218.34(1), F.S. The minimum budget-basis presentation required for the financial statements is the aggregation by fund type of the appropriated budget adopted by the local governmental entity’s governing body.

3. GASB Codification Section 2400.111 states that for budgetary reporting purposes it is desirable to provide note disclosure of the degree to which the reporting entity’s financial operations are subject to a comprehensive “appropriated budget,” “non-appropriated budget,” or are non-budgeted financial activities. Accordingly, local governmental entity financial statements prepared in accordance with Section 218.321(1), F.S., should include notes to financial statements, which disclose both the legal level of budgetary control and, if applicable, more detailed levels of budgetary control established for management purposes. The legal level of budgetary control is the level of control established in the appropriated budget approved by the local governmental entity’s governing body.

4. GASB Codification Section 2300.106h requires that the notes to the financial statements disclose material violations of finance-related legal and contractual provisions. If budget over-expenditures occur at the legal level of budgetary control that are material in relation to a local governmental entity’s financial statements prepared in accordance with Section 218.321(1), F.S., the notes to financial statements should disclose that such budget expenditures are contrary to law.

5. GASB Codification Section 2300.106n requires that the notes to the financial statements disclose any excess of expenditures over appropriations in individual funds. If budget over-expenditures occur at the legal level of budgetary control in individual funds that are not apparent from a local governmental entity’s financial statements prepared in accordance with Section 218.321 (1), F.S., the notes to the financial statements should disclose the budget over-expenditure amounts by individual fund.
The Constitution of Florida and the following list of chapters and/or sections of Florida Statutes are applicable to the units of local government. While it is not all-inclusive, it should provide statutory guidance for the general operation of those units.
