Next Gen MFMP

The Next Generation MFMP solution is leaner and more innovative, providing a modernized cloud-based platform with new modules, functionality, and an improved customer experience built to grow with Florida's evolving procurement processes

Change Network Overview

The change network is a structure of individuals throughout the State who sponsor and advocate for Next Generation MFMP to foster commitment and collaboration.

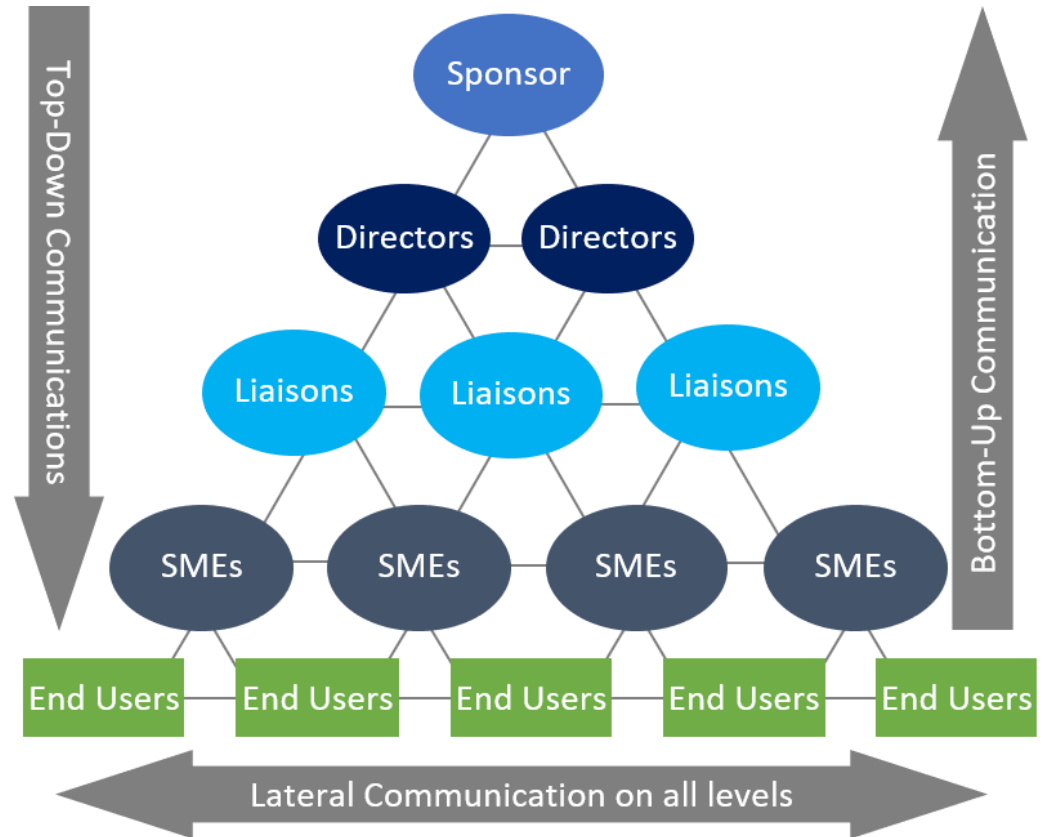

Sponsor has the authority to legitimize and drive change statewide

Directors have the authority, responsibility, and credibility to advocate and drive change for a State Agency

Liaisons are influential people who are responsible for promoting and supporting change at each agency

SMEs support Liaisons in executing tasks in a strategic area within the solution such as Buying, Invoicing, or approval flows

End Users are all affected employees who are required to live the change. (Some Directors, Liaisons, and SMEs may also be "End Users")

What the Change Network Does

The Next Generation MFMP change network is responsible for meaningful actions that contribute to the success of the project in several ways:

- Review and approve agency customer system access
- Ensure staff completes all requests, trainings, and assignments
- Collaborate and communicate with others in the Agency Change Network
- Help to organize and control agency customer feedback and concerns
- Mitigate change resistance, provide user support and program advocacy
- Relay information to the Next Gen MFMP Project Team
- Support the Change Network based on expertise
- Ask questions
