

Floridians,

On Monday, I had the opportunity to join [Sean Spicer](#) on Newsmax's Spicer & Co to discuss how Florida is fighting woke investments, and highlight that we are in the process of separating ourselves from China by getting a report on what Chinese investments the State Board of Administration has invested in. The fact is, too many fund managers are making investments based on how “woke” a company is. Between COVID-19, supply chain issues and their overall aggression toward the West, we need to start putting our money elsewhere.

This week, I also joined [Cavuto: Coast to Coast](#) to talk about the huge population increase in the Sunshine State. It's obvious that people are voting with their feet right now and Florida is benefiting from it. Nearly 1,000 people a day move to Florida to enjoy no state income tax, a lower cost of living, and a great business climate. Florida is open for business and moving forward with common sense policies thanks to the leadership of Governor Ron DeSantis.

Lastly, I wanted to wish everyone a happy and prosperous New Year. Remember, if you are going to be celebrating with fireworks this New Year's Eve, always put safety first.

Sincerely,

Jimmy Patronis
Chief Financial Officer
State of Florida
