

Types of Investments

Mutual Funds

Mutual Funds respond to the ebbs and flows of the financial markets and the overall economy. Each Investment Provider has a menu of Mutual Funds to choose from. Each Mutual Fund falls into an asset category, which identifies what types of stocks or bonds are held within that fund. Additional information about the Mutual Funds offered by the Plan can be found in the *Quarterly Performance Report* or on the Investment Provider websites.

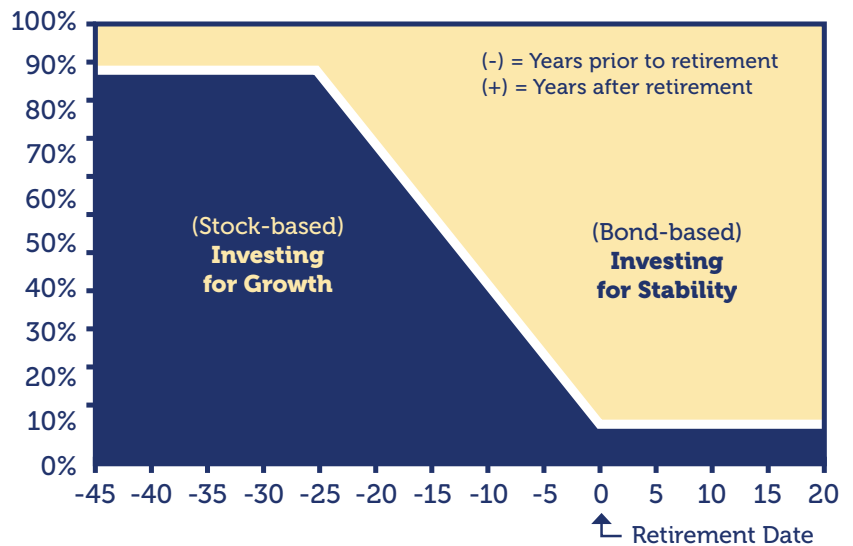

Fixed Accounts

Fixed Accounts are much like savings accounts that gain a predetermined amount of interest, guaranteed through the end of the quarter. Participants can use the Fixed Account to minimize risk and diversify investments. Each Investment Provider offers a Fixed Account, guaranteeing a certain return for the quarter. The assets in Fixed Accounts are backed by the financial strength of the insurance companies offering these products.

Target Date Funds

Target Date Funds provide a diverse mix of investments (stocks, bonds, and cash equivalents) that periodically and automatically adjust over time to grow more conservative as you near your target retirement date. Refer to the graph on the right for an illustration of how a typical Target Date Fund invests your assets over the course of a career. As you can see, Target Date Funds automatically adjust your investments for you. Early in your career you are primarily allocated in growthbased investments. Over time, you are primarily allocated in more stable investments as you gradually near retirement.

These graphs are for general information purposes only and do not disclose the actual investment strategy of any Mutual Fund, Fixed Account, or Target Date Fund products in the Florida Deferred Compensation Plan.

Investment Returns

Fixed Account Returns are guaranteed for the current quarter and are credited & compounded daily. Investment costs are included in the returns of the Fixed Accounts, and assets are subject to the Explicit Fee. The assets in the Fixed Accounts are backed by the financial strength of the insurance companies offering them. Additionally, the Office of Insurance Regulation analyzes the financial condition of the insurance companies on a quarterly basis. Fees are included in the returns of the Fixed Accounts.
