People	Security roles and access permissions will be properly	Logged	05/12/25	Security Admins, HR,	Working on the user role matrix for APD					

Processes	configured			Supervisors, External Auditors	
Processes Technology Data	Reports used in the legacy system will be recreated accurately	Logged	05/12/25	Finance, Program Managers, Oversight Agencies	UAT and training will be used for report checking
People Processes Technology Data	Project timeline will remain on schedule despite unknowns	Logged	05/12/25	Project Managers, Executive Sponsors, All involved teams	At 9/8 - no change for the timeline yet
People Processes Technology Data	UAT - the system requirements and user stories reflect the real-world processes and accounting requirements of the end users.	Logged	07/07/25	UAT - Critical features may be missing or behave incorrectly, requiring rework late in the project	UAT Pending
People Processes Technology Data	UAT for August - version being tested includes all features required for accounting functions and is free of critical/blocking bugs.	Logged	07/07/25	UAT Tests may not reflect true accounting workflows, leading to gaps or inability for validation.	Interface testing is currently in progress
People Processes Technology Data	UAT Testers have sufficient training or knowledge of the new system as they execute UAT from PALM instruction, are able to validate the accounting processes.	Logged	07/07/25	UAT - hard to determine false positives and false negatives.	pre-req training is being completed by SME's
People Processes Technology Data	Assuming that connected systems (e.g., payroll, enterprise systems, all modules, tax engines, banks) are available and simulate live interaction appropriately for UAT	Logged	07/07/25	UAT - Errors may appear that are integration-related (enterprise systems) rather than related to the core application, delaying sign-off.	Enterprise system is being tracked by APD as the dependancies are agency wide
People Processes Technology Data	Timeline & Scheduling Assumptions  • The overall project timeline will shift, or downstream activities (training, cutover prep, data migration) will need to be compressed or re-sequenced.  • A buffer must be assumed for additional test cycles or defect resolution, since issues may be uncovered later than planned. • Project milestones tied to UAT completion (e.g., training readiness, go-live rehearsals) will also shift.	Logged	09/08/25	Schedule - dates - timelines must change	APD is waiting to see what impact this will have on everyone with holidays coming up
People Processes Technology Data	Resource & Cost Assumptions  • Additional time will be required from testers, business SMEs, trainers, and project team members, potentially leading to higher project costs.  • Extended overlap of legacy system and new system (e.g., parallel runs, dual licensing, support contracts) must be assumed.  • Overtime or additional resources may be required to handle compressed activities.	Logged	09/08/25	Impact of financial is all overarching to all aspects of the project	PALM funds are being use for Core PM/BA/IT support - APD Trainer will be a new cost and could extend more than the original project projection
People Processes Technology Data	Training & Change Management Assumptions  • Training materials may need revisions after UAT is complete, as final system behaviors/configurations may not yet be validated.  • End-user training may need to be shortened, delivered closer to go-live, or delivered in waves (e.g., super-user first, general users later).  • Users may have less time to adapt before cutover, so additional hypercare/support must be assumed post go-live.	Logged	09/08/25	All Users are affected	UAT - Training - we will need to update any training to adjust for an adjustment to how long training and UAT will last.
People Processes Technology Data	Quality & Risk Assumptions  Not all test scenarios may be fully executed if UAT time is reduced, so assumptions must include higher risk of defects surfacing post go-live.  Data migration validation may be less thorough, requiring additional reconciliation effort during hypercare.  Post-go-live support demand will likely be higher than originally planned due to reduced user readiness.	Logged	09/08/25	All Users are affected	Risks increase if time is not allowed for the full time needed for the whole project success elements
People Processes Technology Data	Stakeholder & Communication Assumptions  • Stakeholders must assume increased communication needs to manage expectations and maintain user confidence.  • Executive sponsors may need to assume greater tolerance for go-live risk or accept the trade-off of delaying further.	Logged	09/08/25	All Users are affected	Updates, communication and all direction from PALM must become and stay transparent
