The RW Task Timeliness dials reflect the timeliness of your agency's submission of all RW tasks based on the task due date. Calculations are based on all RW tasks to date.

The RW Task Completeness dials reflect the completeness of your agency's task submissions based on the task rubric. Calculations of task completeness includes all RW Tasks since RW 512.

Change Champion Network:

• Unique Filled Role = 14

• Duplicate Filled Role = 0

• Vacant Role = 0

The Change Champion Network composition reflects the completeness of your CCN makeup.

The dials above include an intuitive Green-Yellow-Red spectrum, where green indicates the measure is in a positive range, yellow represents that the gaps in expected results present an increasing risk to the agency, and red indicates that there are significant gaps in expected results that present an elevated risk level for the agency.

Contingency plans have been identified and Commerce is currently working to determine best response if Project Costing module will not provide needed support.		reports, negatively impact audit readiness, and delay decision making processes that rely on cumulative financial data.	
Open and Mitigating	12/12/24		Business Process Change	Documentation Tracking Process	Decreasing	9 (High/High)	Team identified the need for a consistent documentation tracking process.	Develop documentation tracking process tool, schedule meetings with supervisors and determine a centralized location for BPs. We will then develop a matrix to cross check and verify all BPs listing in the tracking tool are in the centralized location. Supervisors will provide any missing information or correct incorrect information.	If there is no documentation tracking process in place, then documentation updates may be missed, causing delays, inconsistencies, or errors in project deliverables.	Commerce is currently in the process of creating a centralized process in Sharepoint.
Open and Mitigating	12/12/24		Training	Common Understanding of Florida PALM project goals	Decreasing	6 (Medium/High)	Florida PALM project impacts many business units in Commerce's F&A area. Team acknowledges there must be unity in understanding of project goals.	Provide project update communications to team or team members associated with the areas of impact via email, Teams channels, Teams chat, face-to-face and/or virtual meetings. Also provide opportunities to participate in workshops and CoLab sessions provided by PALM. We will also provide and share information to team members with office/agency social gatherings approved by management in approved locations/areas.	If there is no common understanding of the PALM project goals, then there could be misalignment among team members, leading to potential misunderstandings, inconsistent priorities, and inefficiencies in project task execution.	Though this risk is decreasing, Commerce will remain focused on this risk as more information is released by Florida PALM.
Open and Mitigating	01/30/25		Conversion/Configuration	Data Migration Process	Stable	4 (Medium/Medium)	Proactive efforts by project team to identify potential data-related risks.	- Perform a comprehensive data audit before migration to identify and resolve inconsistencies - Use automated data validation tools to ensure data accuracy during migration - Conduct multiple rounds of data testing in a staging environment to verify accuracy and completeness - Establish a plan to address any critical issues identified post migration	If the data migration process from FLAIR to PALM encounters inconsistencies or errors, then critical financial data could be compromised, leading to reporting inaccuracies and delays in operational processes.	Risk remains stable as we continue interface testing.
Open and Mitigating	01/07/25		Training	End User Training	Stable	3 (High/Low)	Proactive efforts by project team to identify potential end user risks.	- Develop a detailed training plan tailored to various user roles, including hands-on practice sessions - Provide user-friendly guides, FAQs, and on-demand video tutorials for continuous learning - Partner with Florida PALM to provide support helpdesk information to address end-user questions during and after implementation - Involve SMEs and end users in Commerce specific and Florida PALM User Acceptance Testing for familiarization purposes, as well as feedback"	If end users are not adequately trained or fail to adapt to Florida PALM, then system usage could be inefficient, causing a decrease in productivity and potential disruption to daily operations.	This risk remains stable, as Florida PALM has not released the End User Manual. This manual is necessary in that it will provide key procedural information concerning how processes will be performed in Florida PALM.
Open and Mitigating	01/07/25		Interface	FLAIR Integrations	Stable	2 (Medium/Low)	Proactive efforts by project team to identify potential interface risks.	- Conduct a system mapping and dependency analysis for all interfacing applications - Test integrations thoroughly during User Acceptance Testing - Partner with Florida PALM, third-party vendors, and in-house teams to ensure compatibility - Monitor system performance post-integration and address any issues promptly using Florida PALM help desk"	If FLAIR does not seamlessly integrate with existing Commerce applications and third-party interfaces (MFMP, etc.), then there could be disruptions in data exchange, resulting in operational bottlenecks and delayed financial transactions.	Risk remains the same as we are in testing.
Open and Mitigating	01/07/25		Business Process Change	Business Processes Alignment with Florida PALM	Stable	2 (Medium/Low)	Proactive efforts by project team to identify potential business process risks.	- Review all Florida Commerce Finance & Administration business processes impacted by the Florida PALM implementation in order to identify inefficiencies and areas for improvement before system implementation - Collaborate with key	If existing business processes are not adequately reviewed and aligned with Florida PALM, the inefficiencies may persist or new process gaps could emerge, leading to operational delays and reduced system effectiveness	This risk remains stable, as Florida PALM has not released the End User Manual. This manual is necessary in that it will provide key procedural information concerning how processes will be performed in Florida PALM.
