

# Know Your Change Impact

*Do you conduct business with other agencies?*

**A**

**In FLAIR Today:** Agencies make a Journal Transfer (JT) to pay another agency directly, in lieu of issuing a state warrant or EFT/ACH.

**B**

**In Florida PALM:** Agencies will use an Inter/IntraUnit (IU) transaction to send or receive funds with other agencies. The IU module also supports transfers or allocations within agencies.

## Agency Considerations

How do we issue or receive payments with other agencies?

How will using IU transactions affect our business process and/or business systems?

Do we need to remediate a business system to align with the new process?

Inter/IntraUnit was discussed in the [Design Segment IV Workshop](#). Presentations and videos are available on the Florida PALM website. Additionally, the [Knowledge Center](#) has process flows for IU Transactions.
