

AGENCY IMPLEMENTATION ACTIVITIES

In September, the Readiness Workplan was released announcing the 150+ tasks to be completed to promote agency readiness for Florida PALM. This chart highlights key agency Readiness Workplan (RW) tasks during this fiscal year, broken down by Current State Analysis, Transformation Planning, System Build, and Testing, with the dates of the Segment Design Workshops overlayed as vertical lines.

Current state analysis tasks are the foundation of future analysis and decision making. The RW tasks build upon one another to support your agency's implementation phases (design, build, test, train, and deploy). RW Task 501 - Create Agency Specific Implementation Schedule, due December 15, is your agency's opportunity to create your own timeline and set of activities to complete these implementation tasks.

"Success is the residue of planning."
- Benjamin Franklin

The **Florida PALM Knowledge Center** will be a place to share documents and information with agencies to help them understand Florida PALM and how it will affect future state business processes. The Florida PALM Knowledge Center will serve as the central hub of information that will help agencies quickly access documentation that describes the design and uses of Florida PALM for Financials and Payroll Wave functionality. The Florida PALM Knowledge Center will include information such as a glossary, business process models, and interface and report overviews. As more information becomes available, content will be added, including replacing the Pathfinder, which has been retired in anticipation of the roll out of the Knowledge Center.

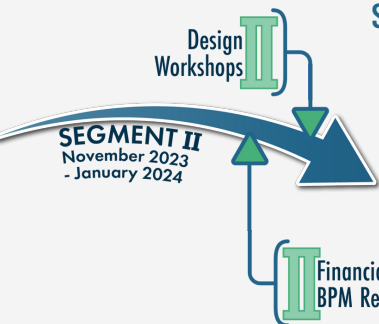

UPCOMING MEETINGS

Segment II Business Process Models Review Meetings

- When: December 5, 6, and 7
- Purpose: Review and discuss the proposed business process models for nine business processes. Click on the Financials Wave BPM Reviews icon to learn more.
- To register, talk to your Agency Liaison

Segment II Design Workshops - Save the Dates!

- When: January 9, 10, 11 and 16, 17, 18
- Purpose: Discuss the final designs for Segment II business processes, including interfaces, reports, conversions, and configurations
- Registration is coming soon
