

Do you run reports in Florida PALM?

What's a Run Control ID?

If you are assigned any Reporter Role you will create and use Run Control IDs. This will allow you to use pre-set filters when accessing the same report in the future without having to modify it. Think of a Run Control ID as a key and your report as a locked door. Once you have the key, you can unlock the door, or report, with ease!

A unique Run Control ID is needed for each report you run. Choose any name for your Run Control ID, and identify specific criteria for your report, creating the “key”. This is your key, which can't be shared with any other user. Once established, you can search for and use your Run Control ID to access your report.
