

Session Question ID	Webinar Question	Florida PALM Response
1	When FLAIR is no longer working this step, will TR96 be replaced by something else?	Yes, the transactions known in FLAIR today will not exist in Florida PALM. This process has not yet been designed in Florida PALM.
2	When you input disinvestments in Florida PALM, does this post in Central?	Yes
3	When there is a mistake and the record has been submitted for approval by the processor, as the approver, do we deny the record and then delete it, or can we delete the record without having to do the approval step?	When the approver receives the disinvestment that is incorrect, the record must be returned to the processor to be corrected.
4	Does a TR10 post to Central and Departmental?	TR45 in Central and TR96 in Departmental. For this process the TR10 is not part of the disinvestment process. The TR45 would be what is needed in Central and the TR96 in Departmental will be used to make the correction.
