The Fire and Emergency Incident Information System Technical Advisory Panel meeting was called to order.

On a motion duly made, the minutes from the Fire and Emergency Incident Information System Technical Advisory Panel held on May 6, 2021 were approved.

Motion carried.

REPORT FROM DIVISION: *given by Julius Halas, Director*

- Guest, Terry Buckles to give live demonstration of Tableau Data Analytics.
- Budget request (LBR) in for next year, working together with IT to fund user access points throughout the State so data will be available to fire departments and they would have the authority to use system. If the Panel decides this is not the way to go, the LBR can be withdrawn. This is separate from the LBR for FCDICE.

REPORT FROM FFIRS: *given by Melissa Dembicer (handout provided)*

- The FFIRS Program has processed over 2.613 million incidents for 2020, (2.806 in 2019)
- Approximately 416 departments are participating, an audit will be done as some of the bigger departments have not reported.
- The Panel is encouraged to reach out to departments in their area to encourage reporting.
- The 2020 Florida Fires Annual Report is nearing publication.
- Continuing to audit and update reporting list.
- Software updates may have caused some delays with reporting.

REPORT FROM EMS: *Tom DiBernardo, Florida Department of Health*

- Change of warehouse vendor, Biospatial now holds all EMS records in the State of Florida, reporting and data warehouse. They also import all vehicle crash records and are attached to the EMS records. Individuals can now go back to their EMS record and view the actual crash report by law enforcement.
- Last year, over 4 million records. This year, already at 2.5 million records
- Now under the Health Information Exchange, all EMS records are attached to the hospital discharge records. Individuals can now go back and look at report, crash report and hospital outcome discharge records (if transported) all in one view. Florida is the first State in the country to attach those three data sources together.

Presentation given by Bureau Chief Telly Buckles with the Department of Financial Services IT Department on Tableau Data Analytics.

Recording available by request

Further discussion held on presentation.

OLD BUSINESS: None
