DRAFT

Enter and Process Budget Journals

General Information

This document describes and depicts the process steps and supporting information for the identified State business process. Within the *Process Flow Details* section, included for each process step are:

- **Process Step ID** – A unique number assigned to each process step
- **Process Step Title** – A short description assigned to each process step
- **Description of Process** – A detailed narrative description of the process step
- **Ledger Impacts ID** – The number assigned to the documented accounting entry associated with the step

Also described below are the Ledger Impacts and *Reports*, which are displayed as icons on the *Business Process Flow Diagrams*. Finally, included in the *Terminology* section are definitions of terms which will help the reader to better understand the document.

Dependencies and Constraints

- The General Appropriations Act (GAA) authorizes appropriations that are developed and published in the Legislative Appropriations System/Planning and Budgeting Subsystem (LAS/PBS) and transferred to Florida PALM.
- LAS/PBS is not included in the scope of the Florida PALM Project as it continues to be owned and supported by the Executive Office of the Governor, (EOG) Office of Policy and Budget (OPB).
- Budgetary codes are developed and published in LAS/PBS and transferred to Florida PALM.
- Agency appropriation balances should not exceed the General Appropriations Act appropriation.
- All appropriations adjustments are first developed and published in LAS/PBS before being transferred to Florida PALM.
- Agencies have the option to create allotments as a management tool, at the account, contract, project, and grant ChartFields. However, for those agencies who elect not to create allotments, the GAA/Adjusted Appropriations are loaded to each business unit's budget entity levels systematically.
- The Department of Financial Services, (DFS) Division of Accounting and Auditing (A&A) and EOG/OPB work collaboratively to identify errors to balance Florida PALM and LAS/PBS budget ledgers.

Business Process Overview

The Enter and Process Budget Journals Business Process area addresses how LAS/PBS appropriations data files are transferred to Florida PALM, the creation of agency allotments and the reconciliation of Florida PALM and LAS/PBS budget ledgers daily. Florida PALM records all appropriations data files (batch and audit) transferred from LAS/PBS. The appropriations data files transferred are as follows:

This document is draft and subject to change

- GAA/Adjusted Appropriations
 - Annually, these appropriations data files are transferred from LAS/PBS to record adjusted appropriations which ensure the accurate and timely capture of appropriations that have been adjusted to reflect vetoes, supplementals, failed contingents, non-operating, and releases.
- Batch File Load
 - Periodically, these appropriations data files are transferred from LAS/PBS to load batch files which are statewide adjustments. These adjustments typically include risk management (casualty insurance) premiums, state employee retirement, data processing assessment, human resources services, and salary and benefits adjustments.
- Budget Amendments Load
 - Typically, these appropriations data files are transferred daily from LAS/PBS to adjust agency appropriations throughout the fiscal year (FY) after the GAA/Adjusted Appropriations has been recorded.

The State of Florida's FY operates from July 1 through June 30. Annually, agencies prepare a Legislative Budget Request (LBR) and other required documentation. The LBR asks for budgetary spending authority needed to accomplish the agency's functions and is supported by the goals and objectives outlined by the agencies. During this planning period, the Governor prepares a recommended budget for the State while each chamber of the Legislature develops its own version of appropriations bills. A joint-member conference committee prepares the final appropriations which are included in the GAA, passed by the Legislature, and signed into law by the Governor.

The GAA/Adjusted Appropriations data files are transferred from LAS/PBS to Florida PALM to post appropriations for state agency use. Agencies are notified that GAA/Adjusted Appropriations are available and agencies have the option to implement budget allotments to assist budget management methods. Agency Budget staff reviews current year appropriations to determine budget allotments to track transactions appropriately and use the Florida PALM Oracle Business Intelligence (BI) Financial Analytics tool to develop budget allotment scenarios. For those agencies who elect not to create allotments, the GAA/Adjusted Appropriations are loaded to each business unit's budget entity levels systematically.

As noted earlier, LAS/PBS is not included in the scope of the Florida PALM Project as it continues to be owned and supported by the EOG/OPB. Therefore, it is essential for Florida PALM and LAS/PBS budget ledgers to be reconciled daily throughout the FY to ensure budget ledgers remain balanced.

Daily, DFS and EOG/OPB perform collaborative reconciliation practices to identify and resolve any error(s) that may reside in the budget ledgers of Florida PALM and LAS/PBS. Reconciliation is an accounting process that demonstrates and documents that the ledger balances of Florida PALM and LAS/PBS systems are in agreement and balanced. Florida PALM and LAS/PBS systems produce reports, that include summarized balances by budget entity, category, and fund level which are utilized to reconcile to the following balances:

- Appropriations
- Mandatory Reserve

This document is draft and subject to change

- Releases
- Unbudgeted Reserve

DFS and EOG/OPB utilize reports and supporting documentation throughout the collaborative reconciliation. DFS and EOG/OPB collaboratively review document summary, budgetary posting transactions, and appropriation reconciliation reports to ensure Florida PALM and LAS/PBS budget ledgers are balanced.

Lastly, throughout the Enter and Process Budget Journals process area DFS and EOG/OPB issue memorandums that provide direction and guidance for the management of appropriations.

Subprocess Flow Details

The table below describes steps in the business subprocess as reflected on the Process Flow diagrams. The table also reflects information associated with each step describing the intent of the specific process.

The Business Process Flow Diagrams use horizontal swim lanes to depict where activities are performed by different parties or systems. Each swim lane is titled with a role, either agency-based or enterprise-based, and in some cases, are representative of an external party or system. The swim lanes may change from page to page within a single business subprocess as more or fewer roles are required to execute sections of the business subprocess. Optionally, the process flow diagram may reflect vertical swim lanes to further designate information such as systems or time intervals.

20.1.1 – Post Appropriations	
Swim Lanes – Definition	<p>EOG/OPB: responsible for publishing appropriations including budget adjustments in LAS/PBS and functions performed by Systems Design and Development (SDD)</p> <p>DFS Budget Processor: DFS role responsible to create, process, and manage Appropriations, Release, and Reserve Budget Journals</p> <p>DFS Budget Approver: DFS role responsible to approve Appropriations, Release, and Reserve Budget Journals</p>

Proc Step ID	Process Step Title	Description of Process
1	Develop/Publish Appropriations Files	EOG/OPB develops and publishes data files for the GAA/Adjusted Appropriations, Supplementals, and Budget Amendments for Appropriations, Releases, and Reserves Budget Journals.
2	Notify DFS of Appropriations Files Transfer	EOG/OPB notifies DFS of appropriations files transfer. DFS and EOG/OPB work collaboratively and maintain communications throughout the post appropriations process.

Process Step ID	Process Step Title	Description of Process
3	Transfer Appropriations Files	Appropriations files are electronically generated in LAS/PBS for Adjusted Appropriations, Supplementals, and Budget Amendments at the beginning of each FY and at varying times throughout the FY for transmittal to A&A. Appropriations files include a data field titled Florida PALM File or PALM File indicator that notes whether the file is a batch or audit file. Typically, Adjusted Appropriations, and Supplementals Appropriations files are batch files and Budget Amendments appropriations files are audit files.
4	Open New Budget Year	Prior to start of the new fiscal year, the DFS Budget Processor opens a new budget year in Florida PALM. This accommodates receipt of the appropriations files for the next FY in advance of the new fiscal year. New budgetary ChartField values are also set up in Florida PALM before the new FY as made available by LAS/PBS.
5	Load Appropriations Files and Create Budget Journals	Interface data files for GAA/Adjusted Appropriations, Supplementals, and Budget Amendments are loaded to create Appropriations, Releases, and Reserves in Florida PALM. The Budget Import Process imports interfaced data files from LAS/PBS into Florida PALM. If there are no errors with the Execute Budget Import process, Budget Journals are created. Once appropriations are successfully created, they are reviewed by the DFS Budget Processor, who makes the appropriations available for posting to the Budget Ledger. Approved Budget Journals are submitted to the DFS Budget Processor via workflow.
6	Review Error(s)	Through the Budget Import Process, if there are errors, the records with errors are not be loaded into Florida PALM and subsequent Budget Journals are not be created. The DFS Budget Processor uses the LAS/PBS Appropriations Status Report which provides detail transactions regarding any errors within the LAS/PBS data files transferred to Florida PALM.
7	Confirm ChartField Value is Configured	If budget journals are not created, the DFS Budget Processor determines the reasons for failure. The primary reason is due to a new budgetary ChartField values for which appropriations have been published by LAS/PBS but have not been established in Florida PALM prior to the Budget Import execution process. The DFS Budget Processor follows the Set Up and Maintain ChartField Values Business Process to set up the appropriate ChartFields in Florida PALM.
8	Enter Manual Budget Journals	Once the ChartFields have been set up in Florida PALM, the appropriations records that failed the Budget Import process, are be created in Florida PALM via direct entry instead of re-importing from LAS/PBS via the Execute Budget Import process. The corrected appropriations are created in Florida PALM directly via the Manual Budget Journals page online. This page can be used if there are lower volume of appropriations to be created directly in Florida PALM.

This document is draft and subject to change

Process Step ID	Process Step Title	Description of Process
		The DFS Budget Processor navigates to the Budget Journals Page and creates the appropriations for the designated agency using applicable ChartField combinations. The DFS Budget Processor inputs all details as needed from the LAS/PBS appropriations data to successfully save the entry online.
9	Create via Spreadsheet Upload	The corrected appropriations can be created in Florida PALM directly via the Spreadsheet Upload utility tool that is a Microsoft Excel application. This method can be used if there are higher volume of appropriations to be created directly in Florida PALM. The processor works directly in the Microsoft Excel application to access the Spreadsheet Upload tool and create the appropriations for the appropriate Agency using the appropriate ChartField combinations inputting all appropriate and adequate details as the appropriations files from LAS/PBS sufficient to successfully save online. Budget journals created from the spreadsheet upload are routed to the DFS Budget Processor via workflow.
10	Execute Budget Import Process	Once a spreadsheet upload file has been created, the Execute Budget Import process program imports appropriations data into the Budget Header and Budget Line tables in preparation for review and posting.
11	Post Budget Journals	<p>Once appropriations (General Appropriations Act (GAA)/Adjusted Appropriations, Supplementals, and Budget Amendments for Appropriations, Releases, and Reserves) are created and reviewed, they are posted to update the budget ledgers</p> <p>Budget allotment journals are posted to update budget ledgers to ensure correct balances. Budget journals are also posted as part of the Appropriation Budget Ledgers Reconciliation process to ensure Florida PALM and LAS/PBS ledgers are in balance. Revenue estimates budget journals are posted to update the appropriate ledger. During the Budget Close business process, budget journals are created for Carry Forward and Certified Forward reversions. Upon running the Budget Close process, reversion amounts are posted to the Budget Ledger. Reports and queries are generated after budget journals have been posted to confirm the posting.</p>
12	Create Documentation File	The DFS Budget Processor creates documentation file and verifies all statewide documents processed, which includes posted budget journals reports.
13	Notify EOG/OPB & Agency of Successful Budget Load	Once appropriations have been successfully posted, agencies are notified of the successful budget load. The DFS Budget Processor communicates to EOG/OPB and agencies via workflow.
14	Receive Successful	Once appropriations have been successfully posted, the EOG/OPB receives notification of successful budget load.

This document is draft and subject to change

Process Step ID	Process Step Title	Description of Process
	Budget Load Notification	

20.1.2 – Manage Agency Allotments	
Swim Lanes – Definition	<p>Agency Budget Approver: agency role responsible for the management and approval of agency allotments</p> <p>Agency Budget Processor: agency role responsible for the processing of agency allotments</p> <p>Agency Program Processor: agency role responsible for the submission and monitoring of agency allotments</p>

Process Step ID	Process Step Title	Description of Process
1	Review Current Year Agency Appropriations	Agencies have the option to implement budget allotments as a feature to assist budget management methods. For those agencies that choose to implement budget allotments, after the GAA/Adjusted Appropriations is posted and agencies are notified, Agency Budget staff reviews current year appropriations to determine budget allotments to track transactions appropriately.
2	Review Prior Year Agency Allotments/Expenditures and Enable Oracle BI Tool	<p>Agency Budget staff may review prior year agency allotments and expenditures to assist in determination of current year allotments. The Florida PALM Oracle BI Financial Analytics tool is available to develop budget allotment scenarios based upon each agency's current year appropriations. Examples of allotment scenarios may include the following:</p> <ul style="list-style-type: none"> ○ Apply previous fiscal year's allotments to be current fiscal year's allotments and reconcile any differences to balance with appropriations. ○ Apply previous fiscal year's expenditures to be current fiscal year's allotments and reconcile any differences to balance with appropriations. ○ Create allotment budget journals via the spreadsheet upload process. <p>Following the creation of allotments, the Florida PALM Oracle BI Financial Analytics tool can be used to publish an annual operating budget.</p>
3	Create Manual Budget Journals	Once ChartField values have been created in Florida PALM to address the reported errors, the Allotment Budget Import process is executed or processor manually enters budget allotments. The budget allotment journals are created in Florida PALM directly via the manual budget journals page online. This online page can be used for low number of budget allotment journals. The agency budget

This document is draft and subject to change

Process Step ID	Process Step Title	Description of Process
		processor navigates to the budget journals online page and creates the budget allotments for appropriate ChartField combinations inputting all appropriate and adequate details as the Budget File from LAS/PBS sufficient to successfully save online.
4	Create Budget Journals via Spreadsheet Upload	Agency allotment budget journals can be created in Florida PALM directly via the spreadsheet upload utility tool that is on Microsoft Excel application. This method is used if there is a higher volume of budget allotments to be created directly into Florida PALM. The agency Budget Processor works directly in the Microsoft Excel application to access the spreadsheet upload tool and create budget allotments including the appropriate ChartField combinations inclusive of appropriate details.
5	Execute Agency Allotment Import Process	Once the budget allotments are saved, the Execute Budget Import process program imports the budget allotments into the budget header and budget line tables, to the budget ledger in Florida PALM, in preparation for review and posting.
6	Review Error(s)	Once the budget allotment journals are successfully created, Agency Budget Processor reviews for posting to the ledger. Agency Budget Processor submits budget journals to an Agency Budget Approver for approval via workflow.
7	Confirm ChartField Value is Configured	The execution of the budget import process could produce errors preventing the upload of budget allotment journals. If there are no errors, then the budget allotment journals can be reviewed to be posted. When there are errors, the agency budget processor reviews errors and works to resolve. The budget import process may fail when a ChartField value has not been configured to create budget allotments of appropriations. The agency budget processor needs to confirm that any new ChartFields are successfully created before agency allotments can be created.
8	Notify Agency Programs of Successful Allotments Upload	The Agency Budget Approver notifies agency programs after budget allotment journals have been successfully posted.
9	Request Budget Allotment (New, Adjust, or Transfer)	The Agency Program office manages and monitors agency allotments. If a need for a budget allotment or allotment adjustment is needed, an Agency Program Processor initiates the request for an allotment or adjustment to verify that there is available budget. Following a valid budget check, an Agency Program Approver creates a request for a budget allotment. The Agency Program Processor requests budget allotment (new, adjustment and/or transfer) to the Agency Budget Approver via workflow.
10	Approve Budget	An Agency Budget Approver reviews and approves the request initiated by the Agency Program office. The Agency Budget Approver

This document is draft and subject to change

Process Step ID	Process Step Title	Description of Process
	Allotment (New, Adjust, or Transfer)	approves budget allotment (new, adjustment and/or transfer) and submits to Agency Budget Processor via workflow.
11	Receive/ Review Allotment Adjustments	Upon approval, the Agency Budget Approver provides the allotment adjustments to an Agency Budget Processor who receives and reviews the adjustments for understanding. Agency Budget Processor creates budget journals in Florida PALM via spreadsheet upload or direct manual entry. Agency Budget Processor receives approved allotments from Agency Budget Approver for processing via workflow.

20.1.3 – Budget Ledger Reconciliation

Swim Lanes – Definition	<p>EOG/OPB: role responsible for publishing appropriations including budget adjustments in LAS/PBS and functions performed by SDD</p> <p>DFS Budget Processor: role responsible to create, process and manage Appropriations, Release, and Reserve Budget Journals</p> <p>DFS Budget Approver: role responsible to approve Appropriations, Release, and Reserve Budget Journals</p>
--------------------------------	--

Process Step ID	Process Step Title	Description of Process
1	Publish Appropriation s Budget Ledger Reconciliation Daily File	EOG/OPB publishes the Appropriation Budget Ledger Reconciliation Daily File.
2	Transmit Appropriation Budget Ledger Reconciliation Daily File	EOG/OPB transmits appropriation budget ledger reconciliation daily file, as a normal course of day-to-day operations. This file contains daily balances of appropriations as captured in LAS/PBS, which includes the fund, budget entity, category, appropriation, mandatory reserve, unbudgeted reserve and releases.
3	Load LAS/PBS Appropriation s Reconciliation Daily File	DFS receives the appropriation budget ledger reconciliation daily file. The LAS/PBS appropriations reconciliation daily file loads into Florida PALM for systematic reconciliation of budget ledgers.
4	Run and Distribute Appropriation Budget Ledgers	The Appropriation Budget Ledgers Reconciliation process runs in Florida PALM to compare the legislative budgetary codes and appropriation balances in LAS/PBS to the Florida PALM budget ledgers are balanced. The appropriation budget ledger reconciliation reports are configured to systemically reconcile the Florida PALM and

This document is draft and subject to change

Process Step ID	Process Step Title	Description of Process
	Reconciliation Reports	<p>LAS/PBS budget ledger balances. The process generates reconciliation reports for use and electronically distributed to DFS and EOG/OPB in preparation of analysis.</p> <p>If the ledgers are balanced, no further action or analysis is required, and the process is complete. However, if budget ledgers are out of balance, DFS and EOG/OPB researches the applicable budget ledgers to determine issues and determines what is needed to balance the budget ledgers.</p> <p>DFS receives request from EOG/OPB to run Appropriation Budget Ledgers Reconciliation process in Florida PALM to compare the appropriation balances in LAS/PBS to the Florida PALM budget ledgers balances.</p>
5	Research and Identify Any Reconciling Items with EOG/OPB	<p>If budget ledgers are not in balance, the appropriation budget ledger reconciliation reports list Florida PALM and LAS/PBS budgetary codes and balances which are unmatched. DFS and EOG/OPB maintains constant communication to collaboratively take appropriate actions to resolve any issues.</p> <p>Budgetary posting budget journals include budget amendments, batch files, and transactions that require a posting to Florida PALM.</p>
6	Record Correcting Budget Journals	<p>If the budget ledger errors are attributable to Florida PALM, DFS manually records appropriate budget journals in the system to resolve unbalanced budget ledgers. The specific budget journals vary as they are dependent on the resolutions identified collaboratively between DFS and EOG/OPB. DFS generates appropriation reconciliation reports after Florida PALM budget journals have been processed.</p>
7	Review Budget Journals and Run Reconciliation Process	<p>DFS reviews budget journals created and initiates the Appropriation Budget Ledgers Reconciliation process again via workflow to ensure budget ledgers are balanced. The process generates reconciliation reports and are electronically distributed to DFS and EOG/OPB in preparation of analysis.</p>
8	Record Correcting LAS/PBS Transactions	<p>If the budget ledger errors are attributable to LAS/PBS, EOG/OPB records appropriate transactions to resolve unbalanced budget ledgers. The specific transactions vary as they are dependent on the resolutions identified collaboratively between EOG/OPB and DFS.</p>
9	Review Budget Transaction and Request Reconciliation Process	<p>EOG/OPB reviews budget transactions created and requests DFS to run the Appropriation Budget Ledgers Reconciliation process again to ensure budget ledgers are balanced. The process generates reconciliation reports and are electronically distributed to EOG/OPB and DFS in preparation of analysis. EOG/OPB requests DFS to run the Appropriation Budget Ledgers Reconciliation process in Florida</p>

This document is draft and subject to change

Process Step ID	Process Step Title	Description of Process
		PALM via workflow to compare the appropriation balances in LAS/PBS to the Florida PALM budget ledgers balances.

20.1.4 – Estimated Revenue

Swim Lanes – Definition	<p>Agency Budget Approver: agency role responsible for the management and approval of revenue estimates</p> <p>Agency Budget Processor: agency role responsible for the processing revenue estimates</p>
--------------------------------	--

Process Step ID	Process Step Title	Description of Process
1	Review Prior Year Receipts and Revenue Collected	Agencies reviews prior year receipts and revenue collected in preparation of recording estimated revenue. Agency Budget staff reviews prior FY agency receipts and revenue collected to assist in determination of current year revenue estimates. The Florida PALM Oracle BI Financial Analytics tool is available to analyze past receipts and revenue collect to assist in developing revenue estimates for current fiscal year. Throughout the fiscal year, agencies can update revenue estimates as appropriate prior to closing fiscal year.
2	Extract Revenue Data from Agency Business Systems	Agencies are able to extract revenue data from agency business systems directly into Florida PALM.
3	Create Budget Journals via Spreadsheet Upload	Agency revenue estimates budget journals are created in Florida PALM directly via the spreadsheet upload utility tool that is on Microsoft Excel application. This method can be used if there is a higher volume of revenue estimates budget journals to be created directly into Florida PALM. The agency Budget Processor works directly in the Microsoft Excel application to access the spreadsheet upload tool and create budget allotments including the appropriate ChartField combinations inclusive of appropriate details.
4	Execute Revenue Estimate Import Process	Once the revenue estimates budget journals are saved, the Execute Budget Import process program imports the revenue estimates budget journals into the budget header and budget line tables, to the budget ledger in Florida PALM, in preparation for review and posting.
5	Confirm ChartField Value is Configured	The execution of the budget import process could produce errors preventing the upload of revenue estimates budget journals. If there are no errors, then the revenue estimates budget journals can be reviewed to be posted. When there are errors, the agency budget

This document is draft and subject to change

Process Step ID	Process Step Title	Description of Process
		processor reviews errors and works to resolve. The budget import process may fail when a ChartField value has not been configured to create revenue estimates of appropriations. The agency budget processor needs to confirm that any new ChartFields are successfully created before revenue estimates can be created.
6	Create Manual Revenue Estimate Budget Journals	Once ChartField values have been created in Florida PALM to address the reported errors, the revenue estimates import process can be executed or manually enter revenue estimates. The revenue estimates budget journals can be created in Florida PALM directly via the manual budget journals page online. This online page can be used for low number of revenue estimates journals. The agency budget processor navigates to the budget journals online page and creates the revenue estimates for appropriate ChartField combinations inputting all appropriate and adequate details as the Budget File from LAS/PBS sufficient to successfully save online.
7	Review Revenue Estimate Journals	Once the revenue estimates journals are successfully created, Agency Budget Processor reviews for posting to the ledger. Agency Budget Processor submits revenue estimates budget journals to Agency Budget Approver for approval via workflow.
8	Notify Agency Programs of Successful Revenue Estimates Upload	The Agency Budget Approver notifies agency programs after revenue estimates budget journals have been successfully posted.

This document is draft and subject to change

Ledger Impacts

Ledger Impact ID	Ledger - Ledger Impact Title	Ledger Impact Description
LI1	Budget Ledger – Expenditure Budget Entry*	Increases Budget Increases Spending Authority
	Budget Ledger – Expenditure Budget Transfer*	Decreases Budget Decreases Spending Authority
	Budget Ledger – Revenue Estimate	Increases Revenue Budget Increases Total Revenue Estimate Balance

**applies to Appropriations, Releases, Reserves, and Allotments*

Reports

Report Number	Report Description	Report Frequency	Audience
R1	LAS/PBS Appropriations Balances Load Report –provides a reconciliation of the total number of records and balances from the LAS/PBS data files transferred to Florida PALM.	On Demand	DFS
R2	LAS/PBS Appropriations Status Report – provides detail transactions regarding any errors within the LAS/PBS data files (any budgetary codes, multiple fund match and/or no fund match found, including associated EOG codes) transferred to Florida PALM.	On Demand	DFS
R3	Posted Budget Journals Report – provides detail transactions regarding any budget journals posted (appropriations, allotments, Carry Forward, Certified Forward, estimated revenue, etc.) and available by designated journal type, time periods and ChartField combinations.	On Demand	DFS, Agency
R4	Schedule of Allotment Balances Report – provides an accrual basis budget report within an	On Demand	DFS, Agency

	designated time periods by ChartField combinations.		
R9	Florida PALM Oracle BI Financial Analytics Tool – provides ability to develop budget allotment scenarios based upon each agency’s current year appropriations.	On Demand	Agency
R10	Florida PALM Oracle BI Financial Analytics Tool – provides ability to analyze past receipts and revenue collect to assist in developing revenue estimates for current fiscal year.	On Demand	Agency

Terminology

Allotments – planned expenditures of state appropriations recorded by agencies in the State’s financial management system.

Appropriations – the legal authorization to make expenditures for specific purposes within the timeframes and amounts authorized by law.

Budget – a proposed plan of revenue and expenditures for a given period.

Budget Amendment – legal means by which an adopted budget can be modified.

Budget Entity – a unit or function which reflects the organization to which funds are specifically appropriated in the GAA. A budget entity can be a department, division, program or service.

Category – a dual purpose code that either sub-defines appropriations or defines a revenue source.

Control – the process of ensuring amounts do not exceed authorized budget limits.

Encumbrance – an amount of budget committed for the payment of goods and services ordered but not yet received.

EOG Codes – budgetary codes created and maintained within LAS/PBS.

Fiscal Year – any consecutive twelve-month period designated as the official budget year of the financial reporting entity. The FY for the State of Florida begins on July 1 and ends the following June 30.

Fund Identifier – used to differentiate between several funds of the same state fund type. The first three digits are established by EOG/OPB and the last three digits are added to further

breakdown the fund for cash and/or budget controls. One FID as established by EOG/OPB could be linked to multiple FIDs in FLAIR.

General Appropriations Act (GAA)/Adjusted Appropriations – includes line items and back of the bill appropriations, vetoes, supplementals, failed contingents, nonoperating, releases (1st quarter), reorganizations, transfers, debt service, and reserves.

Legislative Appropriation System/Planning and Budgeting Subsystem (LAS/PBS) – applications that manage the appropriations preparation, approval, and execution process for the State. It consists of the Legislative Appropriation System managed by the Legislature and the FFMS subsystem - Planning and Budgeting Subsystem managed by the Executive Office of the Governor.

Monitor – the process of reviewing and tracking actual results to planned activities.

Nonoperating Budget – means nonoperating disbursement authority for purchase of investments, refunds, payments to the United States Treasury, transfers of funds specifically required by law, distributions of assets held by the state in a trustee capacity as an agent of fiduciary, special expenses, and other nonoperating budget categories, as determined necessary by the Executive Office of the Governor and the chairs of the Senate and the House of Representatives appropriations committees, not otherwise appropriated in the General Appropriations Act.

Releases – the method used for controlling the availability for use of an appropriation in which the amount of budget is identified (usually released quarterly in the case of general revenue and annually for trust funds and certain categories).

Reserves – a budgeted amount segregated from available appropriations and held until certain conditions set by the Legislature are met by an agency at which time they are released to the agency for their use.

Supplemental Appropriations – appropriations enacted by the legislature independent of the GAA. This can include further clarification and intent from the Legislature and may also include appropriations authorized by special proclamations, acts or other legislation not appearing in the GAA.

Business Process Flow Diagrams

Please see 20.1 Enter and Process Budget Journals located in the [D54 Standardized Business Processes > Working > Workstream A folder](#).
