Business Process Overview

Section 17.57(6), Florida Statutes (F.S.), provides that Department of Financial Services (DFS), Division of Treasury (Treasury) is responsible for maintaining banking relationships and setting up authorized bank accounts in Florida PALM. The Manage Banking Relationships business process documents how bank accounts will be set up and maintained in Florida PALM. It also describes how agencies will correspond with Treasury to request approval for outside banking services, request new sub-accounts or changes to existing sub-accounts, order supplies, request Treasury assistance with transaction research, or to contact Treasury with questions.

The business subprocesses included are:

- CW.70.1.1 Maintain Bank Accounts
- CW.70.1.2 Manage Treasury Correspondence

The Maintain Bank Accounts business subprocess describes the process by which agencies may request Electronic Payment Services (EPS) or banking services. Agencies may submit the EPS Request Form to accept credit cards, charge cards, or debit cards for payments. The Banking Services Request Form facilitates an agency’s ability to request outside banking services as well as opening or closing bank accounts and sub-accounts from Treasury. Once a new bank account has been opened with the banking partner, the account is configured in Florida PALM. This step facilitates an agency’s ability to record related transactions in Florida PALM.

The Manage Treasury Correspondence business subprocess describes the process by which agencies request assistance from Treasury through the Treasury Correspondence Form. This form is used to order supplies, request Treasury assistance with transaction research, or to contact Treasury with questions.

Dependencies and Constraints

- Active banking relationships and bank accounts are maintained in Florida PALM for all bank accounts.
- Agencies submit all requests for assistance to DFS through Florida PALM.

Business Process Flow Details

Table 1: Process Steps Included on CW Business Process Model Flow

CW.70.1.1 - Maintain Bank Accounts		
Swim Lanes – Definition	Bank Account Request Processor: Agency role responsible for submitting requests for banking needs DFS Bank Account Maintainer: DFS role responsible for managing banking requests and for maintaining bank account configuration in Florida PALM	
Process Step ID	Process Step Title	Description of Process
1	Determine Banking Need	The agency determines whether there is a need for banking services or to open/close a bank account (e.g., sub-account, revolving fund, clearing fund, Consolidated Revolving Account (CRA), or non-CRA bank account).

This document is draft and subject to change

Process Step ID	Process Step Title	Description of Process
		If the banking need is for a clearing or a revolving account (i.e., CRA subaccount or agency revolving account), the requesting agency submits a request for a Fund following the CW.10.1.3 Add or Modify Fund Values business sub process.
2	Review Fund Questionnaire	The DFS Bank Account Maintainer reviews the Fund Questionnaire Form for the clearing or revolving account request. If the request is not approved, the DFS Bank Account Maintainer notifies the requesting agency.
3	Submit EPS Request Form	<p>The agency determines whether there is a need to utilize Electronic Payment Services (EPS) to accept credit cards, charge cards, or debit cards for payments of goods and services. If needed, the agency submits the EPS Request Form through Florida PALM which routes to the DFS Bank Account Maintainer via workflow.</p> <p>If the request is approved, the DFS Bank Account Maintainer generates the EPS Approval Letter outside of Florida PALM and attaches the letter to the request authorizing the agency to use electronic payment services. If the request is not approved, the form routes back to the Bank Account Request Processor for correction or denial.</p>
4	Submit Banking Services Request Form	Agencies requesting new sub-accounts, deposit locations, or outside banking services, submits the Banking Services Request Form within Florida PALM which routes to the DFS Bank Account Maintainer via workflow, for review and approval.
5	Notify Agency	If the request for EPS or banking services is not associated with opening or closing a bank account, the DFS Bank Account Maintainer generates the EPS Approval Letter and Outside Banking Services Authorization Letter, as appropriate, outside of Florida PALM, attaches the letter to the request, and routes the form back to the Bank Account Request Processor via workflow.
6	Notify Agency	If the request is approved for a clearing or agency revolving account, the DFS Bank Account Maintainer generates the Outside Banking Services Authorization Letter outside of Florida PALM, attaches the letter to the request, granting the agency the authority to negotiate banking services outside of the Treasury, and routes the form back to the Bank Account Request Processor via workflow.
7	Open/Close Bank Account	If the Division of Treasury approves a bank account outside of the Treasury, the DFS Bank Account Maintainer routes the Fund Questionnaire Form to the Bank Account Request Processor. The agency may then open/close the clearing or revolving bank account.

Process Step ID	Process Step Title	Description of Process
8	Submit Banking Information	Once the agency has opened or closed the bank account, the agency adds the bank routing number and last four digits of the account number to the Fund Questionnaire Form and routes back to the DFS Bank Account Maintainer. If the full bank account number is required, the agency communicates the account number confidentially to the DFS Bank Account Maintainer.
9	Open/Close Bank Account	If the account is managed by the Division of Treasury, the DFS Bank Account Maintainer works with the banking partner to open or close the bank account.
10	Maintain Bank Account	If the Division of Treasury approves the request to open or close a bank account, the DFS Bank Account Maintainer requests a new Account value following the CW.10.1.2 Add or Modify Statewide Chartfield Values and establishes the bank account within Florida PALM. The agency is not able to transact in the account until this is complete. For closed accounts, the DFS Bank Account Maintainer deactivates the bank account, which stops all processing in that account in Florida PALM. Prior to deactivating a bank account, all reconciliations must be completed with no remaining bank account balance.
11	Maintain Interface Configuration	If bank statements are imported for the account, the interface configuration is updated by the DFS Bank Account Maintainer to support the interfacing for that bank account.
12	Notify Agency of Account	The DFS Bank Account Maintainer notifies the agency via the form workflow the new account is configured and ready for use.

CW.70.1.2 - Manage Treasury Correspondence		
Swim Lanes – Definition	Agency Requestor: Agency role responsible for submitting correspondence request to Treasury DFS Correspondence Processor: DFS role responsible for reviewing and responding to correspondence requests	
Process Step ID	Process Step Title	Description of Process
1	Determine Need for Treasury Correspondence	The agency determines there is a need to request correspondence from DFS (e.g., deposit support, order supplies, or transaction research).
2	Submit Treasury Correspondence Form	The agency submits the Treasury Correspondence Form within Florida PALM and attaches supporting documents (e.g., debit memos) as necessary. The request is routed to the DFS Correspondence Processor via workflow. The DFS Correspondence Processor reviews the request and determines if research is required.

Process Step ID	Process Step Title	Description of Process
3	Research Request	If research is required, the DFS Correspondence Processor researches the request.
4	Order Supplies	If the request is for supplies, the DFS Correspondence Processor orders the supplies.
5	Respond to Request	The DFS Correspondence Processor responds to the agency on the Treasury Correspondence Form and routes back to the requestor via workflow.
6	Review Treasury Response	The agency reviews the response and determines if further resolution is needed. If the issue is not resolved, the Treasury Correspondence Form is updated and resubmitted.
