Disbursements Management

General Information

This document describes and depicts the process steps and supporting information for the identified State business process. Within the *Subprocess Flow Details* section, included for each process step are:

- Process Step ID – Unique number assigned to each process step
- Process Step Title – Short description assigned to each process step
- Description of Process – Detailed narrative description of the process step
- Ledger Impacts ID – Number assigned to the documented accounting entry associated with the step

Also described below are the *Ledger Impacts and Reports*, which are displayed as icons on the *Business Process Flow Diagrams*. Finally, included in the *Terminology* section are definitions of terms to help the reader to better understand the document.

Dependencies and Constraints

- All Suppliers are required to have a tax identification number that is validated with the Internal Revenue Service (IRS).
- All Suppliers are required to provide 1099 information, which is used for withholding and 1099 reporting.
- The 1099 withhold report is generated for disbursements issued in Florida PALM.
- The IRS is established as the withholding entity and assigned a unique Supplier ID.

Business Process Overview

Florida Palm is used to report taxable payments to the IRS, the State of Florida, and the applicable suppliers, and to withhold federal and state taxes from payments as required by Federal and State laws. As part of the Supplier Set Up Process, the 1099 information is collected and configured in Florida PALM. The 1099 Tax and Supplier Withholdings Process identifies the steps for reviewing 1099 configuration, processing 1099 suppliers and vouchers, and generating and transmitting the 1099 reports.

All suppliers are required to provide a Tax Identification Number (TIN) which must be validated with the IRS prior to issuance of a tax reportable payment. Tax reportable payments generally include payments for services performed. When a supplier submits an invoice for tax-reportable services, the 1099 withholding is made based on the supplier setup, current withholding rules, and the accounting codes for the invoice lines.

Subprocess Flow Details

The table below describes steps in the business subprocess as reflected on the Process Flow diagrams. The table also reflects information associated with each step describing the intent of the specific process.

The Business Process Flow Diagrams use horizontal swim lanes to depict where activities are performed by different parties or systems. Each swim lane is titled with either an agency or an enterprise role. The swim lanes may change from page to page within a single business subprocess as more or fewer roles are required to execute sections of the business subprocess. Optionally, the process flow diagram may reflect vertical swim lanes to further designate information such as systems or time intervals.

30.5 - Process 1099 Tax and Supplier Withholdings	
Swim Lanes – Definition	<p>DFS 1099 Processor: enterprise role responsible for preparing, final review and approval of 1099 issuance</p> <p>Agency AP Processor: agency role responsible for any Voucher corrections needed</p>

Process Step ID	Process Step Title	Description of Process
1	Review 1099 Setup	The setup should be reviewed for: the A1 Calendar; Withholding Entities; Withholding Rules; Withholding Types; Withholding Codes; and set up or review of Report Control Information.
2	Run Withholding Post	This process combines voucher and payment information to generate 1099 reportable data which is used to generate the 1099 reports. All payments must be posted prior running this process.
3	Perform Review of 1099 Items	After posting withholdings, there are many reports and on-screen inquiries available to review the reportable 1099 voucher and payment information. During the review process, vouchers or suppliers may be identified that require marking for withholding.
4	Complete Withholding Supplier Update	Occasionally, a supplier's withholding setup may be incorrect during the year and require an adjustment for 1099 reporting. The Withholding Supplier Update process is used to change withholding applicability, entity, type, jurisdiction, and/or class. When this type of update is used, the system applies the update to all vouchers for that supplier.
5	Complete Withholding Voucher Update	This process is set to update withholding information for a withholding supplier at a voucher line level or for all voucher lines by supplier. Withholding applicability, entity, type, and jurisdiction per voucher line can be changed. The DFS 1099 Processor coordinates with an agency for making corrections and adjustments to vouchers.

This document is draft and subject to change

Process Step ID	Process Step Title	Description of Process
6	Update Withholdings	This process updates the 1099 reportable suppliers and voucher transactions, which were updated as part of Complete Withholding Supplier and Voucher Update Process.
7	Run Withhold 1099 Report Post	After all adjustments have been made, all items are reconciled to make sure there are no more corrections required. The Withholding Report Post process populates the Withholding 1099 Table by extracting data from the Withhold Transaction table and inserting it into the withholding report tables.
8	Generate Withhold 1099 IRS Report	Withholding Reports process creates a flat file for the IRS and populates the "Withholding to Send".
9	Generate/ Review 1099 to Send Detail Report	This report lists all the information created by the 1099 reporting process and is a replica of the data in the file prepared for the IRS. This report can be used to reconcile with the IRS file prior to printing the final report for the supplier.
10	Create 1099 Copy B Report	After all final adjustments and balances are adjusted. Run the 1099 Copy B Reports generated.
11	Review/Print/ Send 1099 to Suppliers	Generated 1099 reports are reviewed, printed, and mailed to the suppliers.
12	Send File to IRS	The IRS file is generated and sent electronically to the IRS.
13	Run Withholding Sent File	The Withholding Sent File finalizes the 1099 reporting by marking the transactions as included in the reported 1099s to designate that the process was completed.
14	Review/ Update Vouchers	An Agency AP Processor coordinates with the DFS 1099 Processor in reviewing and making corrections to voucher data.

Terminology

1099 – the State is required to withhold taxes from eligible payments and is required to annually report such withholdings and the total payments to both the suppliers and the IRS, in a format prescribed by the IRS, referred to as a 1099.

Supplier – all payees are referred to as suppliers in Florida PALM.

Voucher – an internal document that is used to make payment to an external entity, such as a supplier. Normally a voucher is created when an invoice is received from a supplier.

Withholding – amounts deducted from payments made to suppliers for Federal or State taxes. The State is required to withhold for federal income taxes from eligible payments, in accordance with tax status information provided by the supplier, and in accordance with IRS requirements. Such amounts are remitted to the IRS. The State does not have a State income tax but may elect to withhold for other State taxes for applicable suppliers.
