Interim Business Process Models, Reports, Interfaces, and Conversions

Wednesday, November 13, 2019
Thursday, November 14, 2019
Agenda

Day 1:

- Introduction and Background
- Overview of Interim Business Processes
  - Disbursements Management
  - Asset Accounting and Management
  - Accounts Receivable
  - Cash Management
- Wrap Up
Agenda
Day 2:
- Recap of Day 1
- Overview of Interim Business Processes
  - Account Management and Financial Reporting
  - Budget Management
- Reports Approach and Plan
- Interfaces Approach and Plan
- Conversions Approach and Plan
- Wrap Up
INTRODUCTION AND BACKGROUND
Introduction and Background

Welcome

- Housekeeping
  - Facilities logistics
  - Cell phone on silent
  - Participant questions
  - Public meeting with published minutes

- Introductions of Florida PALM Team and DFS Divisions/Office
Introduction and Background

Overview
Introduction and Background

Overview

- Standardized Business Process Models:
  - Organized into eight Business Process Groupings representing collections of business processes
  - Include flow diagrams and supporting narratives
  - Represent the Florida PALM design for all organizations at the conclusion of Wave 2
  - Obtained Executive Steering Committee (ESC) approval on July 24th
Introduction and Background

Overview

Central FLAIR and CMS Transition Timing

All State organizations will transition to Florida PALM in July 2021 for functions currently conducted using Central FLAIR and the Treasury Cash Management Systems (CMS).

The transition to Florida PALM from Central FLAIR and CMS may impact various activities within your organization. For example:

- Deposit and verification process
- Departmental account reconciliation/balancing
- Payment posting and voucher processing
- Budget and cash balance inquiry
- Warrant Cancellations

Stay Tuned!

After finalizing the design of Florida PALM, the Florida PALM Team will be working with organizations to review interface impacts and to support business process changes and training needs.

Questions? Contact the Team at FloridaPALM@MyFloridaCFO.com
Introduction and Background

Overview

Standardized Business Process Models

Interim Business Process Models

Legacy Processes
Introduction and Background

Overview

- The purpose of the Interim Business Process Models is to document, at Pilot, process variations:
  - that Wave Organizations will employ from legacy processes until transition to Florida PALM
  - that Pilot Organizations will employ from the Standardized Business Process Models until Wave 2

- Interim Business Process Model creation engagement includes:
  - DFS Divisions / Office
  - FFMIS Partners
  - All Organizations
Assumptions considered in creating Interim Business Process Models were:

- Revision of Departmental FLAIR will be minimized
- Central FLAIR functions in Departmental will not be available
- Wave organization users will be enabled to use Florida PALM, as appropriate
- Revision of Florida PALM for Interim processes will be minimized
- Florida PALM will support a crosswalk of Chart of Accounts (COA) values for data translation
Introduction and Background

Overview

- Interim Business Process Models:
  - align with Standardized Business Process Model numbering of Business Process Groupings and Business Processes
  - begin with an “I” and then the number of the corresponding Standardized Business Process
  - provide a lower level of detail than the Standardized Business Process Models
  - include interfaces between Departmental FLAIR and Florida PALM

Introduction and Background

Overview

- For Wave Organizations:
  - reports providing data similar to what is provided by Central FLAIR and CMS will be available in Florida PALM
  - data from Florida PALM may be sent to Information Warehouse

- Information from FLAIR and PYRL for all organizations will continue to be sent to the Information Warehouse

- The approach for historical and enterprise reporting is being considered
Introduction and Background

Chart of Accounts

- The Chart of Accounts Design:
  - includes structures, definitions, and individual design components of ChartFields and the Budget Structures by which budgetary and financial controls will be managed
  - has been supported by workshops and working meetings with all organizations
  - is a Major Project Deliverable that will be reviewed and approved by the ESC in January and February 2020

- The minimum amount of COA values will be configured for all organizations at Pilot Go Live
Introduction and Background
Chart of Accounts

- A COA Crosswalk will be available, which will be a tool that supports bi-directional cross walking of values between Florida PALM ChartFields and FLAIR data elements
- As a replacement for the function of Central FLAIR, the 29-Digit Account Code will be set-up and maintained within the tool
- The tool will provide support for interfacing between Florida PALM and legacy systems for the extract of data in legacy-like formats

OVERVIEW OF BUSINESS PROCESS GROUPING

Disbursements Management (DM)
Overview of Business Process Grouping
DM Overview

DM includes a collection of business processes that:

- manage supplier information, including demographic and payment information for tax withholding and reporting purposes
- support the disbursement process for State obligations from encumbrance through payment request, payment creation, and escheatment
- perform month-end and year-end closing activities
30.1 Set Up and Maintain Suppliers
  30.1.1 Add and Update Suppliers Online
  30.1.2 Import Suppliers
  30.1.3 Perform TIN Match
  30.1.4 Manage Intercepts

30.2 Establish and Maintain Encumbrances
  30.2.1 Create and Maintain Encumbrances
  30.2.2 Monitor Encumbrances

November 2019
I.30.1 Set Up and Maintain Suppliers
Overview of Interim Business Process

I.30.1 Set Up and Maintain Suppliers

- Description of Interim Business Process
  - Encompasses all activities that are required to set up and use a supplier profile including adding a new supplier profile, requesting updates to an existing supplier profile, validating a supplier Tax Identification Number (TIN), marking a supplier as confidential, and intercepting a supplier payment for various business events.

- Roles
  - DFS Supplier Approver
  - DFS Supplier Processor
  - Wave Organization Supplier Processor
Overview of Interim Business Process

  - I.30.3.A Process Vouchers
I.30.6 MANAGE TAX REPORTING
Description of Interim Business Process

- Addresses how tax reporting and withholding are handled for supplier and non-payroll payments. Florida PALM is used to report taxable payments to the IRS, the State of Florida, and the applicable suppliers. It is also used to withhold federal and state taxes from payments as required by federal and state laws. As part of the Set Up and Maintain Suppliers standardized business process, the 1099 information is collected and configured within Florida PALM.

Roles

- DFS 1099 Processor
- Wave Organization AP Processor
Overview of Interim Business Process

40.4 Asset Management Period Close

Asset Accounting and Management

Business Process Grouping
1.40.2 ASSET TRANSFERS
Overview of Interim Business Process

I.40.2 Asset Transfers

Description of Interim Business Process

- Transfers of assets between Pilot organizations and Wave organizations require separate independent transactions in Florida PALM and Departmental FLAIR. Assets are retired in one system and created in the other system.

Roles

- Pilot Organization Asset Processor
- Wave Organization Asset Processor
Overview of Interim Business Process

1.40.2 Asset Transfers

Key Interim Business Process Concepts

<table>
<thead>
<tr>
<th>Process/Activity</th>
<th>Impacted Party</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Pilot organization retires the asset or creates the asset record in Florida PALM</td>
<td>Pilot</td>
</tr>
<tr>
<td>The Wave organization retires the asset or creates the asset record in Departmental FLAIR</td>
<td>Wave</td>
</tr>
<tr>
<td>The initiating organization sends detailed asset information (asset description, acquisition date, original cost, accumulated depreciation) to the receiving organization</td>
<td>Pilot Wave</td>
</tr>
</tbody>
</table>
Overview of Interim Business Process
I.40.2 Asset Transfers

- **Variance from Standardized Business Processes**
  - No system to system transfer between the initiating organization and the receiving organization
  - Transfers between Pilot and Wave organizations require the use of ‘retire’ instead of ‘transfer’
  - Asset details are communicated outside of the system
  - Asset records for Wave organizations are managed in Departmental FLAIR

- **Variance from Current Processes**
  - Transfers between Pilot and Wave organizations require the use of ‘retire’ instead of ‘transfer’

- Revenue Accounting (RA) Business Process Grouping
  - Includes processes that manage customer and billing information
  - Processes occur in agency business systems or Departmental FLAIR today
  - Processes remain in agency business systems or Departmental FLAIR during interim period
Overview of Business Process Grouping

AR Overview

- AR includes a collection of business processes that
  - manage accounting, reporting, and collection of outstanding State revenues
  - support the intake and accounting for cash receipts
  - ensure the write-off of outstanding debt is appropriately approved
60.1 Enter and Maintain Receivables
  60.1.1 Record Accounts Receivable
  60.1.2 Period Close

60.2 Deposit and Apply Receipts
  60.2.1 Direct Journal Deposits
  60.2.2 AR Deposits
  60.2.3 Returned Items
  60.2.4 Offsets
  60.2.5 Manage Electronic Receipts Data

60.3 Perform Collections and Aging
  60.3.1 Collections
  60.3.2 Write-Off
60.1 Enter and Maintain Receivables

60.2 Deposit and Apply Receipts
  - I.60.2.A Deposits and Bank Reconciliation
  - I.60.2.B Returned Items
  - I.60.2.C Wave Revenue Reclass

60.3 Perform Collections and Aging

Questions About The Interim Business Process Models
Accounts Receivable (AR)
Overview of Business Process Grouping
Cash Management (CM)
Overview of Business Process Grouping

CM Overview

- Treasury Management (TM) Business Process Grouping:
  - Includes processes that manage banking relationships and reconciliation to bank transactions; manage investment securities and investment earnings apportionment; support cash transfers between bank accounts; and support organization requests of Treasury
  - Processes occur in CMS applications today that will be replaced by Florida PALM
  - Wave and Pilot organizations will use the TM standardized business processes at Pilot Go Live
Overview of Business Process Grouping

CM Overview

- CM includes a collection of business processes that:
  - ensure adequate cash balances to support disbursements and alignment of State and federal cash management requirements;
  - support the forecast and management of cash balances within agency and general revenue funds, including managing fund loans; and
  - support the management for revolving funds located within and outside the State Treasury.

Agenda

Day 2:

- Day 1 Recap
- Overview of Interim Business Processes
  - Account Management and Financial Reporting
  - Budget Management
- Reports Approach and Plan
- Interfaces Approach and Plan
- Conversions Approach and Plan
- Wrap Up/Questions
OVERVIEW OF BUSINESS PROCESS GROUPING

Account Management and Financial Reporting (AMFR)
Overview of Business Process Grouping

AMFR Interim Overview

- AMFR includes a collection of business processes that:
  - establish the statewide accounting framework and provide for agency-specific accounting and reporting needs;
  - update to the general ledger and maintain the integrity of the financial activities; and
  - perform month-end and year-end closing and reporting activities.
10.1 Set Up and Maintain Chart of Accounts
- 10.1.1 Add or Modify Agency ChartField Values
- 10.1.2 Add or Modify Statewide ChartField Values
- 10.1.3 Add or Modify Fund Values
- 10.1.4 Add or Modify Project Values
- 10.1.5 Set Up and Maintain Trees and/or Combination Edits

10.2 Enter and Process Journals
- 10.2.1 Create and Approve Journals
- 10.2.2 Edit Check
- 10.2.3 Sub-module Journal Entry

10.3 Analyze and Reconcile Accounts
- 10.3.1 Perform Month-End Close
- 10.3.2 Perform Allocations

10.4 Close General Ledger and Consolidate Results
Interim Business Process

Account Management and Financial Reporting

Standardized Business Process

- 10.1 Set Up and Maintain Chart of Accounts
  - I.10.1 Establish Statewide Values

- 10.2 Enter and Process Journals
  - I.10.2 Enter and Process Inter/Intraunit Journals

- 10.3 Analyze and Reconcile Accounts
  - I.10.3 Analyze, Reconcile and Close Accounts
I.10.1 Establish Statewide Values
Overview of Interim Business Process

I.10.1 Establish Statewide Values

- Description of Interim Business Process
  - Addresses how statewide values are added or modified in Departmental FLAIR and Florida PALM.

- Roles
  - Wave Organization COA Requester
  - DFS COA Maintainer
Overview of Interim Business Process

I.10.2 Enter and Process Inter/IntraUnit Journals

- Description of Interim Business Process
  - Addresses how Wave organizations transfer funds for payments of goods and services, expenditure refunds and moves, and transfers to Wave or Pilot organizations. It also addresses how Wave organizations perform revenue to revenue transfers to another Wave organization, and how Pilot organizations initiate revenue to revenue transfers to Wave organizations.

- Roles
  - DFS GL Journal Approver
  - Initiating Wave Organization GL Journal Processor
  - Pilot Organization GL Journal Processor
  - Receiving Wave Organization Reporter

Questions About The Interim Business Process Models

Account Management and Financial Reporting (AMFR)
Overview of Business Process Grouping

Budget Management (BM)
Overview of Business Process Grouping

BM Overview

- BM includes a collection of business processes that:
  - manage the tracking and reporting of appropriations, allotments, and revenue estimates, including the exchange of information between LAS/PBS and Florida PALM;
  - manage budget exceptions; and
  - support the close-out of appropriations
Overview of Business Process Grouping

BM Overview

- BM focuses on the functions of the Budget Ledger (also known as Commitment Control (KK) Ledger)
  - Tight integration with the General Ledger, but is used for budgetary control
  - Allows setup of structures and rules that define the budget checking process
  - Serves as a management tool to record and monitor activities ("actuals") against budgeted targets
  - Provides details needed to produce reports on budgets and related activities

Planning, Accounting, and Ledger Management

Models
November 2019
Reported Enablement

- Florida PALM will enable self-service reporting as organizations onboard
  - Organizations will be asked to identify report writers as part of Workforce Transition
  - Training will be provided to report writers on how to use the tools and data available
  - Report writers will be able to create reports using PS Query and Oracle Business Intelligence
  - Report writers will have opportunity to create self-service queries and BI reports during UAT that will be migrated into Production at go-live
Sample Inquiry Screen - Journal Inquiry
Sample PS Query - Journal Totals

Interim Business Process Models

November 2019
Next Steps

- **Pilot Organization Expectations**
  - Confirm Interim reports as part of interim business process model review and include on feedback form which is due 12/13
  - Reports Confirmation Package for standard reports sent out on 10/28 and feedback is due on 11/22

- **Wave Organization Expectations**
  - Confirm Interim reports as part of interim business process model review and include on feedback form which is due 12/13
  - Engage in collaborative confirmation activity based on wave implementation schedule
QUESTIONS
INTERFACES APPROACH AND PLAN
Objectives

- Provide a high-level overview of the interface approach and standards
- Review current and upcoming interface related activities for Pilot and Wave organizations
Standards and Formats

- Interfaces - refer to data exchanges between Florida PALM and other systems
- Integrations - refer to data exchanges within the Florida PALM components
- Standard interfaces - use the format provided by Florida PALM
- Legacy-Like interfaces - use the existing legacy format to the extent possible
Approach

- Introduce expandable and modern interface capabilities
- Minimize change to retiring systems
- Allow organization adoption with wave deployments
- Collaborate regularly with interfacing partners
## Standards and Formats

<table>
<thead>
<tr>
<th>Interface Type</th>

Pilot Organization Interfaces

- Will adopt Florida PALM standard interfaces
- Interface packages with mapping of Florida PALM to current-state
  - Packages sent in October
  - Ongoing collaboration meetings through December
Wave Organization Interfaces

- Will utilize Central FLAIR and CMS Legacy-Like interfaces where appropriate
- Interface packages for organizations with inbound Central FLAIR interfaces
  - Packages sent in October
  - Ongoing collaboration meetings through December
- Future outreach for other Wave organizations to confirm interface usage at Pilot
Wave Organization Interfaces

- Central FLAIR standard outbound interfaces
  - AD1: Account Description File
  - MB1: Master Balance
  - TR1: Transaction History
- CMS standard outbound interfaces
  - Bank Transactions
  - ACH Notice of Change
  - Debit Memos for returns and adjustments including Paper return images
Next Steps

- Draft layouts for standard Florida PALM interfaces provided in January 2020
- Interface Workshops and office hours will be held in February/March 2020
- Interface Connection Inventory will be compiled by April 2020 through ongoing organization collaboration
QUESTIONS
CONVERSIONS APPROACH AND PLAN
Objectives

- Provide a high-level overview of the conversion approach and inventory
- Review current and upcoming conversion related activities for Pilot and Wave organizations
Approach

- Convert data for go-forward transactional processing
- Perform data cleansing in the legacy systems to the extent possible
- Conduct multiple mock conversions to confirm data conversions
- Collaborate regularly with conversion partners
## Conversion Inventory
